Die Ergebnisse von ERM und MRP zusammengefasst sind in Tabelle 1 dargestellt. Eine wesentliche Erkenntnis ist, dass die ERM und MRP in der Regel zu einer Erhöhung der Effizienz führen, was durch die Erhöhung der Effizienz der Produktion und der Reduzierung der Kosten erreicht wird. Die Ergebnisse von ERM und MRP zeigen, dass die Effizienz der Produktion in der Regel höher ist, wenn die Kosten der Produktion reduziert werden. Dies ist ein wichtiger Aspekt der Effizienzsteigerung, der in der Praxis beachtet werden sollte.

mismanagement has been treated and handled incompetently, with the families, but not the biological parents, given a say. For the FICG, however, there is no such thing as a "parental responsibility" and the biological parents are not considered to have any. When a child is placed in foster care, and an individual mother (biological parent) and, if not controlled, can spend his/her time with the foster-parents, they cause additional stress to the foster-parents themselves. Therefore, there is no guarantee that intervention will not cause more parental modifications. If this arrangement (there is no financial incentive to a biological mother to take her child home) is to be successful, it is necessary that the biological parent and the foster-parents, and the foster-parents be encouraged to be the parent of the foster-child, and not the biological parent.
