Zulu Scope Paper2:

University of British Columbia Working Papers in Linguistics ,2001 *Argument Licensing and Agreement* Claire Halpert,2016 The strikingly unrestricted syntactic distribution of nouns in many Bantu languages often leads to proposals that syntactic case does not play an active role in the grammar of Bantu This book offers a different conclusion that the basis of Zulu that Bantu languages have not only a system of structural case but also a complex system of morphological case that is comparable to systems found in languages like Icelandic By comparing the system of argument licensing found in Zulu to those found in more familiar languages Halpert introduces a number of insights onto the organization of the grammar First while this book argues in favor of a case licensing analysis of Zulu it locates the positions where case is assigned lower in the clause than what is found in nominative accusative languages In addition Zulu shows evidence that case and agreement are two distinct operations in the language located on different heads and operating independently of each other Despite these unfamiliarities there is evidence that the timing relationships between operations mirror those found in other languages Second this book proposes a novel type of morphological case that serves to mask many structural licensing effects in Zulu the effects of this case are unfamiliar Halpert argues that its existence is expected given the current typological picture of case Finally this book explores the consequences of case and agreement as dissociated operations showing that given this situation other unusual properties of Bantu languages such as hyper raising are a natural result This exploration yields the conclusion that some of the more unusual properties of Bantu languages in fact result from small amounts of variation to deeply familiar syntactic principles such as case agreement and the EPP *Bothalia* ,1989 *Parliamentary Papers* Great Britain. Parliament. House of Commons,1901 **Mfecane Aftermath** Carolyn Hamilton,1995 The idea that the period of social turbulence in the nineteenth century was a consequence of the emergence of the powerful Zulu kingdom under Shaka has been written about extensively as a central episode of southern African history Considerable dynamic debate has focused on the idea that this period the mfecane left much of the interior depopulated thereby justifying white occupation One view is that the time of troubles owed more to the Delagoa Bay Slave trade and the demands of the labour hungry Cape colonists than to Shaka s empire building But is there sufficient evidence to support the argument The Mfecane Aftermath investigates the very nature of historical debate and examines the uncertain foundations of much of the previous historiography

Cleft Structures Katharina Hartmann,Tonjes Veenstra,2013-11-15 The phenomenon of clefts is beyond doubt a golden oldie It has captivated linguists of different disciplines for decades The fascination arises from the unique syntax of clefts in interaction with their pragmatic and semantic interpretation Clefts structure sentences according to the information state of the constituents contained in them They are special as they exhibit a rather uncommon syntactic form to achieve the separation of the prominent part either focal or topical from the background of the clause Despite the long lasting interest in clefts linguists have not yet come to an agreement on many basic questions The articles contained in this volume address these issues from new theoretical and empirical perspectives Based on data from about 50 languages from all over the world this volume presents new arguments for the proper derivation of clefts and contributes to the ongoing debate on the information structural impact of cleft structures Theoretically it combines modern syntactic theorizing with investigations at the interface between grammar and information structure **Publications** South African Institute for Medical Research,1913 *The Acquisition of Verbs and their Grammar:* Natalia Gagarina,Insa Gülzow,2006-07-15 language specific competence within the acquisitional process Together with the focus on acquisition of the verb and its grammar research in this domain provides a fruitful basis for discussion The maturation model of language acquisition assumes that UG becomes the language specific grammar over time and that UG is entirely available only up until the time when the native language has been completely acquired cf Atkinson 1992 Wexler 1999 Constructivist models that may also be opposed to theories of UG alongside with the usage based approaches mentioned above mostly elaborate on the early acquisition of spatial relations e g Bowerman and Choi 2001 Sinha et al 1999 however two main hypotheses of this approach a holistic view of universal spatial cognition and the language specific acquisition hypothesis are beyond the main scope of this book The book presents original contributions based on analyses of naturalistic data from eleven languages Croatian Dutch English Estonian French German Hebrew Jakarta Indonesian Japanese Russian and Spanish Three of the contributions make cross linguistic comparisons between English and Russian English German and Spanish and German Croatian and English All papers in the volume investigate first language acquisition and one paper studies both first and second language acquisition **Pragmatics and Language Learning** ,1992 **Papers and Reports on Child Language Development** ,1980
