Best-selling author Jakob Nielsen and coauthor Kara Pernice used rigorous usability methodology and eyetracking technology to analyze 1.5 million instances where users look at Web sites to understand how the human eyes interact with design. Their findings will help designers, software developers, writers, editors, product managers and advertisers understand what people see or don't see when they look and why. With their comprehensive three-year study, the authors confirmed many known Web design conventions, and the book provides additional insights on those standards. They also discovered important new user behaviors that are revealed here for the first time. Using compelling eye-gaze plots and heat maps, Nielsen and Pernice guide the reader through
