World Development Indicators 2015 World Bank, 2015-04-10 *World Development Indicators 2015* World Development Indicators 2015 provides a compilation of relevant high quality and internationally comparable statistics about global development and the fight against poverty. It is intended to help policymakers, students, analysts, professors, program managers and citizens find and use data related to all aspects of development including those that help monitor progress toward the World Bank Group's two goals of ending poverty and promoting shared prosperity. Six themes are used to organize indicators: world view, people, environment, economy, states and markets, and global links. As in past editions, *World Development Indicators* reviews global progress toward the Millennium Development Goals (MDGs) and provides key indicators related to poverty. WDI 2015 includes a selection of the most popular indicators across 214 economies and 14 country groups organized into six WDI themes: Thematic and regional highlights providing an overview of global development trends; An in-depth review of the progress made toward achieving the Millennium Development Goals; A user guide describing resources available online and on mobile apps; A complementary online data analysis tool is available this year to allow readers to further investigate global, regional and country progress on the MDGs; data.worldbank.org/mdgs. Each of the remaining sections includes an introduction, six stories highlighting specific global, regional or country trends, and a table of the most relevant and popular indicators for that theme, together with a discussion of indicator compilation methodology. WDI DataFinder Mobile App: Download the WDI DataFinder Mobile App and other Data Apps at data.worldbank.org/apps. WDI DataFinder is a mobile app for browsing the current WDI database on smartphones and tablets using iOS, Android and Blackberry, available in four languages: English, French, Spanish and Chinese. Use the app to browse data using the structure of the WDI, visually compare countries and indicators, create, edit and save customized tables, charts and maps, share what you create on Twitter, Facebook and via email.

[Global Anti-Money Laundering Regulation](#) Nkechikwu Azinge-Egbiri, Nicholas Ryder, Ehi Eric Esoimeme, 2024-11-25. This book explores the politics of money laundering and terrorist financing (ML/TF) regulation in several countries across Africa and the Small Island States. Developed countries created the Financial Action Task Force (FATF) to combat ML/TF globally. Expectedly, the FATF's standards mirror existing banking regulations within the G7 countries. Yet the standards apply to all countries irrespective of the limited ML/TF risks they pose to the global economy, their weak pre-conditions for effective regulation, and their non-involvement in the FATF's framing. Still, such countries, mainly within the Global South, have worked hard to amplify their compliance with the regime due to fears of the repercussions of their non-compliance. This collection demonstrates how the global ML/TF regulation is treated as an implicitly superior legal regime where the Global South must comply irrespective of their perception of the FATF's legitimacy challenges. It shows that beyond exogenous factors such as neo-colonialism, endogenous factors such as weak institutions and corruption undermine the compliance trajectory of the Global South. Furthermore, it analyses the unintended consequences of

transplanting FATF standards into diverse legal and cultural contexts The volume contributes to our understanding of the challenges of transplantation from the Global North and how the Global South is steering within the constraints created by the FATF It advocates for a comprehensive understanding of the nuanced compliance challenges of developing countries It further proposes practical solutions to address them emphasizing the importance of risk based understanding accountability capacity building and coordination in achieving effective anti money laundering and counter terrorist financing measures The collection will be essential reading for researchers academics and policy makers working in financial crime regulation and international economic law **Parliamentary Debates (Hansard)**.
