Smith, 2023-09-19 Why our current system of higher education is financially and morally unsustainable and how to address the crisis with the creative implementation of digital technologies For too long our system of higher education has been defined by scarcity scarcity in enrollment scarcity in instruction and scarcity in credentials In addition to failing students professionally this system has exacerbated social injustice and socioeconomic stratification across the globe In *The Abundant University* Michael D Smith argues that the only way to create a financially and morally sustainable higher education system is by embracing digital technologies for enrolling instructing and credentialing students the same technologies that we have seen create abundance in access to resources in industry after industry The Abundant University explains how we got our current system why it s such an expensive inefficient mess and how a system based on exclusivity cannot foster inclusivity Smith challenges the

resistance to digital technologies that we have already seen among numerous institutions citing the examples of faculty resistance toward digital learning platforms While acknowledging the understandable self preservation instinct of our current system of residential education Smith makes a case for how technology can engender greater educational opportunity and create changes that will benefit students employers and society as a whole Universities, Rankings and the Dynamics of Global Higher Education Hans Peter Hertig, 2016-06-30 Global university rankings are now more than a decade old and this book uses the data they have produced to examine how the international landscape of universities has changed over the years It offers new insights into the power and limits of league tables a key element of globalized higher education that can be deplored but hardly ignored Case studies from Asia Europe and North America are explored to highlight the issues raised by a quantitative exercise that decontextualizes what is linked so strongly to local factors **How to Raise an Adult** Julie Lythcott-Haims, 2015-06-09 New York Times Bestseller A provocative manifesto that exposes the harms of helicopter parenting and sets forth an alternate philosophy for raising preteens and teens to self sufficient young adulthood Julie Lythcott Haims is a national treasure A must read for every parent who senses that there is a healthier and saner way to raise our children Madeline Levine author of the New York Times bestsellers *The Price of Privilege* and *Teach Your Children Well* In *How to Raise an Adult* Julie Lythcott Haims draws on research on conversations with admissions officers educators and employers and on her own insights as a mother and as a student dean to highlight the ways in which overparenting harms children their stressed out parents and society at large While empathizing with the parental hopes and especially fears that lead to overhelping Lythcott Haims offers practical alternative strategies that underline the importance of allowing children to make their own mistakes and develop the resilience resourcefulness and inner determination necessary for success Relevant to parents of toddlers as well as of twentysomethings and of special value to parents of teens this book is a rallying cry for those who wish to ensure that the next generation can take charge of their own lives with competence and confidence For parents who want to foster hearty self reliance instead of hollow self esteem *How to Raise an Adult* is the right book at the right time Daniel H Pink author of the New York Times bestsellers *Drive* and *A Whole New Mind* **Graduate Debt Free** David F. Shutler, 2023-08-14 Escape the matrix of student loan debt In his new book Dave Shutler analyzes twelve faulty assumptions about obtaining a higher education and shows how they can lead to debilitating college debt Analogizing to the two realities in the Matrix movies he reveals underlying facts about the assumptions to high schoolers and their parents These assumptions range from deciding whether to attend college in the first place to the importance of selecting a major to how to minimize college living costs This book is a systematic guide to the many misconceptions that students hold in the college application process Shutler analyzes each misconception showing how it can lead to debt and then provides strategies to escape that debt Dave Shutler sheds light on scholarships and other significant funding sources that are available for the enterprising student and explores the federal laws that govern student debt He

identifies underlying policy decisions that have contributed to the 17 trillion federal debt burden and offers several strategies to help individuals navigate student debt without succumbing to it Through planning students can take charge of their education and escape the matrix of ever increasing college costs *Access and Expansion Post-Massification* Ben Jongbloed, Hans Vossensteyn, 2015-12-14 This edited collection addresses the crucial issues emerging from the ongoing expansion of higher education focusing on how national systems of higher education can respond further expand when traditional routes to have been largely exhausted *Introducing Communication Research* Donald Treadwell, Andrea Davis, 2019-07-30 Introducing Communication Research Paths of Inquiry teaches students the basics of communication research in an accessible manner by using interesting real world examples engaging application exercises and up to date resources Best selling author Donald Treadwell and new co author Andrea Davis guide readers through the process of conducting communication research and presenting findings for scholarly professional news media and web audiences The Fourth Edition continues to emphasize the Internet and social media as topics of and tools for communication research and incorporates new content on online methodologies qualitative research critical methodologies and ethics **Place, Not Race** Sheryll Cashin, 2014-05-06 From a nationally recognized expert a fresh and original argument for bettering affirmative action Race based affirmative action had been declining as a factor in university admissions even before the recent spate of related cases arrived at the Supreme Court Since Ward Connerly kickstarted a state by state political mobilization against affirmative action in the mid 1990s the percentage of four year public colleges that consider racial or ethnic status in admissions has fallen from 60 percent to 35 percent Only 45 percent of private colleges still explicitly consider race with elite schools more likely to do so although they too have retreated For law professor and civil rights activist Sheryll Cashin this isn't entirely bad news because as she argues affirmative action as currently practiced does little to help disadvantaged people The truly disadvantaged black and brown children trapped in high poverty environs are not getting the quality schooling they need in part because backlash and wedge politics undermine any possibility for common sense public policies Using place instead of race in diversity programming she writes will better amend the structural disadvantages endured by many children of color while enhancing the possibility that we might one day move past the racial resentment that affirmative action engenders In *Place Not Race* Cashin reimagines affirmative action and champions place based policies arguing that college applicants who have thrived despite exposure to neighborhood or school poverty are deserving of special consideration Those blessed to have come of age in poverty free havens are not Sixty years since the historic decision we're undoubtedly far from meeting the promise of *Brown v Board of Education* but Cashin offers a new framework for true inclusion for the millions of children who live separate and unequal lives Her proposals include making standardized tests optional replacing merit based financial aid with need based financial aid and recruiting high achieving students from overlooked places among other steps that encourage cross racial alliances and social mobility A call for action toward the

long overdue promise of equality Place Not Race persuasively shows how the social costs of racial preferences actually outweigh any of the marginal benefits when effective race neutral alternatives are available

Metrics That Matter Zachary Bleemer, Mukul Kumar, Aashish Mehta, Chris Muellerleile, Christopher Newfield, 2023-03-21 Colleges sell themselves by the numbers rankings returns on investments and top ten lists but these often mislead prospective students What numbers should they really be paying attention to High school and college students are inundated by indicators and rankings supposedly designed to help them decide where to go to college and what to study once they arrive In Metrics That Matter coauthors Zachary Bleemer Mukul Kumar Aashish Mehta Chris Muellerleile and Christopher Newfield take a critical look at these metrics and find that many of the most popular ones are confusing misleading and most importantly easily replaceable by more helpful alternatives Metrics That Matter explores popular metrics used by future and current college students with chapters focusing on colleges return on investment university rankings average student debt average wages by college major and more Written for students their families and the counselors who advise them each chapter explains a common metric's fundamental flaws when used as a basis for making important educational decisions The authors then draw on decades of scholarship from many academic fields to pair each metric with a concrete recommendation for alternative information both qualitative and quantitative that would be more useful and meaningful for students to consider They emphasize that students should be thinking beyond solely using metrics when making college decisions students should focus on their intellectual and academic education goals not just vocational or monetary ones Students reliance on certain metrics has skewed universities away from providing high quality education and distorted the perception of higher education's purpose overemphasizing private financial returns over the broader economic and social benefits of universities This book aims to facilitate important student decisions while reorienting public perceptions of higher education's values and how universities should measure their own success

The Complexity of Human Rights Philip Alston, 2024-02-08 This book provides the first systematic assessment from a human rights law perspective of the landmark contributions of the renowned legal anthropologist Sally Engle Merry What impact does oversimplification have on human rights debates The understandable tendency to present them as a single universal and

immutable concept ignores their complexity and by extension only serves to weaken them Merry and her colleagues transformed human rights thinking by highlighting the process of vernacularization which sees rights discourse as being unavoidably dependent upon translation and interpretation She also warned of the pitfalls of excessive reliance upon statistical and other indicators through the process of quantification Here the leading voices in the field assess the significance of these contributions

Controversies on Campus Joy Blanchard, 2018-01-12 Providing a comprehensive review of pressing issues roiling American college campuses today this

book is a valuable resource for students and scholars alike People often refer to America s colleges and universities as Ivory Towers a term that implies that campuses are innocent places of study largely insulated from wider societal concerns In actuality our nation s universities are hotbeds of controversy Some of these sources of heated debate relate directly to access to the college experience such as the rising cost of tuition and admission policies related to student diversity Others reflect wider societal schisms such as divisions over sexual assault both causes and responses and political correctness

Controversies on Campus Debating the Issues Confronting American Universities in the 21st Century examines the myriad controversies regarding today s college campuses and student bodies such as tuition costs campus rape academic freedom free speech gun policies binge drinking hook up culture corporatization of academic research poverty level wages of adjunct faculty and student athletes in the era of big money amateur sports The book objectively examines these issues and others taking care to not only present up to date quantifiable data to help readers understand the controversy but also to provide a fair and impartial summary of perspectives on the issue in question It is a one stop resource for learning about a wide range of issues and controversies confronting American colleges and universities and the people students professors and administrators who comprise those communities

Grading the College Scott M. Gelber, 2020-06-23 A comprehensive history of evaluation in American higher education In *Grading the College* Scott M Gelber offers a comprehensive history of evaluating teaching and learning in higher education He complicates the conventional narrative that portrays evaluation as a newfangled assault on the integrity of higher education while acknowledging that there are many compelling reasons to oppose those practices The evaluation of teaching and learning Gelber argues presented genuine dilemmas that have attracted the attention of faculty members and academic leaders since the 1920s Especially during the peak era of faculty authority that followed the end of the Second World War significant numbers of professors and administrators believed that evaluation might improve institutional performance reduce the bias inherent in traditional methods of supervision strengthen communication with laypersons and encourage a more deliberate focus on the distinctive goals of college Gelber reveals the extent to which professors and academic interest groups participated in the development of our most common evaluation instruments including student course questionnaires achievement tests surveys rubrics rankings and accreditation self studies Although these efforts may seem distant from the present era of shortsighted scrutiny and ill conceived comparisons Gelber demonstrates that the evaluation of college teaching and learning has long consisted of a set of intellectually sophisticated questions that have engaged and could continue to engage faculty members and their advocates By providing a deeper understanding of how evaluation operated before the dawn of high stakes accountability *Grading the College* seeks to promote productive conversations about current attempts to define and measure the purposes of American higher education

Opportunities and Challenges at Historically Black Colleges and Universities M. Gasman, F. Commodore, 2014-11-25 In this edited collection the authors grapple with both the strengths and challenges that HBCUs face as the nation s
