Bellanger,2010-06-01 The author presents an extremely detailed record of the organization doctrine and equipment of the Armored Division of September 1943 He examines each unit of the division A chapter is dedicated to the Tank Battalion Armored Infantry Battalion but also Maintenance and Medical Battalions The author examines the organization and tactical doctrine of each unit and studies the doctrine of employment of the unit as well as the duties of key personnel Each sub unit is presented by lists of personnel weapons vehicles and equipment The book includes 146 charts depicting the organization of all units In each chapter a special paragraph examines the modifications made in the field by armored division s units as found in unit reports and histories and veterans recollections This is an essential reference for re enactors modellers wargamers researchers and all those who require a detailed guide to the U S Armored Division during WWII **The M1 Carbine** Leroy Thompson,2011-11-20 In 1938 the US Chief of Infantry requested that the Ordnance Department develop a carbine to be used by service and support troops artillerymen machine gun crews tankers mortar crews and other troops not needing the power of the M1 Garand rifle The development of this new weapon was given an added impetus by Germany s successful use of airborne and glider troops early on in World War II This caused a fear amongst US officers that troops normally considered behind the lines personnel might have to fight elite German troops and would therefore require a more effective weapon than their standard pistols The resulting M1 Carbine was a not a shortened version of the standard service rifle but instead a brand new design chambering a new cartridge Eventually numerous manufacturers would combine to produce over six million M1 Carbines before the end of the war This book charts the complete story of the weapon from its design to its operational history and its impact upon warfare National Guard Bureau Manual United States.
