Key to this problem is how it explicitly links something important in students daily lives to the classroom This motivational feature is vital as students define the what where and how of resolving the problem situation Problem based learning may sound potentially chaotic and haphazard but it rests on the firm foundation of a teacher s work behind the scenes The teacher develops a problem long before students see it specifically choosing the skills and content the problem will emphasize and matching those to curriculum and standards Though a PBL problem will have no right answer the teacher structures the experience so that specific learning takes place as students generate the problem solving steps research issues and produce a final product The teacher guides without leading assists without directing Note This product listing is for the Adobe Acrobat PDF version of the book **Japanese Education Today** ,1987 *Teachers Handbook, Elementary Grades..* Dallas (Tex.).
