The Slippery Slope of Healthcare Steven Z. Kussin, 2020-03-24 Dr Steven Kussin physician and a pioneer in the Shared Decision movement takes readers through the steps of how to avoid the many pitfalls of unnecessary and sometimes even dangerous medical care The American healthcare system is subsidized by its services to healthy people The goal as it is for any business is to encourage people to become consumers by creating an emotionally fueled demand for things that are suddenly and urgently needed It s hard to make healthy people well it s easy to make them sick Under the goal to make you even healthier the medical industry identifies and encourages investigations and preventive technologies for problems unlikely to occur unlikely to harm unlikely to benefit from testing and once diagnosed unlikely to benefit from treatment Profitable services go on indefinitely for those who are young and well For the health care industry being in good health is not just the best way to live good health is also the slowest way to die Many people find themselves on what the author calls the Slippery Slope experiencing a cascade of escalating misfortunes produced by more tests with incrementally greater risk expense and fewer benefits Many people who in the attempt to improve what is already just fine unquestioningly pay an immediate and visible price for what are distant invisible and uncertain benefits The central starting point for initiating a Slippery Slope adventure can be the first blood test the first screening test the first x ray the first pill or the first diagnosis that s accepted by unwitting and trusting consumers The bottom of the Slippery Slope is occupied by those previously well but who now are damaged and by others who suffered needless unscheduled deaths America s famed consumer skepticism when judging retail products is curiously and dangerously absent in their interactions within the healthcare system Here Steven Kussin offers strategies that give readers knowledge and power by offering unique perspectives information and resources He confronts the mighty forces arrayed against health care consumers and helps readers learn to identify them themselves The power of money the authority of science the stature of physicians the lure of elective health improvements the promise of technology and the pitch perfect perfect pitches of televised ads all conspire to push people in directions that are often at odds with their stated priorities and interests This book is dedicated to one lesson The view from atop the Slope before making a health care decision is better than the view from the bottom after having made a bad one For more

The Single Payer Healthcare System

- Faults and Fixes Henry P. Krahn,2016-03-03 Despite widespread pride by Canadians about their healthcare delivery system the unprecedented wait list for diagnosis and treatment leads to needless suffering and avoidable deaths Provincial government officials dictate a fixed budget for each institution and program and healthcare providers must adhere to a strict bottom line To keep a cash starved system afloat until the end of each fiscal year involves closing beds even though the demand is dire maintaining an insufficient supply of nursing homes causing a shortage of physicians nurses and technicians restricting overtime for all employees canceling procedures at the last moment because of shortages and maintaining a scarcity of investigative machinery In The Single Payer Healthcare System Faults and Fixes Dr Henry Krahn draws from his long career as a urologist to give an unparalleled inside look at the government's version of socialized medicine He explains the changes that occurred in Manitoba as the province transitioned from a functional and fluid single payer insurance system to the government-managed quagmire of wait lists and scarcity it is today He argues persuasively that by using a single payer non profit mutual insurance approach with arms length government oversight Canada could create a universal healthcare delivery system that provides affordable high quality treatment within days rather than months The healthcare system should include international healthcare insurance coverage at Canadian rates With extensive examples convincing arguments and a lifetime of experience Dr Krahn points the way towards a system for which Canadians could truly be proud

Sick to Debt Peter A. Ubel, 2019-11-26 An informed argument for reworking the broken market based U S healthcare system by making cost and quality more transparent The United States has the most expensive healthcare system in the world While policy makers have argued over who is at fault for this the system has been quietly moving toward high deductible insurance plans that require patients to pay large amounts out of pocket before insurance kicks in The idea behind this shift is that patients will become better consumers of healthcare when forced to pay for their medical expenses Laying bare the perils of the current situation Peter A Ubel a physician and behavioral scientist notes that even when patients have time to shop around healthcare costs remain largely opaque difficult to access and hard to compare Arguing for a middle path between a market based and a completely free system Ubel envisions more transparent smarter healthcare plans that tie the prices of treatments to the value they provide so that people can afford to receive the care they deserve Fanaroff and Martin's Neonatal-Perinatal Medicine E-Book Richard J.
