Urban Composition Developing Community Through Design Mark C Childs:

Urban Composition Mark C. Childs, 2013-07-02 Cities and towns are among humanity's greatest achievements yet no single individual or organization creates them. The buildings, streets, and gardens of even a small town embody substantial investments of money, natural resources, and political capital. Much more than the sum of its parts, a settlement's vitality comes from its collective composition. Sometimes the cities and towns that emerge are glorious places, but too frequently they have only fragments of greatness or are soulless and environmentally unhealthy. Our new *Architecture Brief: Urban Composition* shows architects, planners, artists, and engineers of individual projects how they can best fulfill their public trust to help make meaningful urban places. Each chapter contains a set of design queries followed by a discussion, illustrations, and references for further research. This accessible primer on urban design provides guidelines for designing buildings or plans for large cities or small towns. *Urban Composition* showcases projects across the United States and internationally in metropolitan areas such as Chicago, Seattle, and London, and small communities such as Marfa, Texas.

Designing Suburban Futures June Williamson, 2013-05-07 Suburbs deserve a better, more resilient future. June Williamson shows that suburbs aren't destined to remain filled with strip malls and excess parking lots; they can be reinvigorated through inventive design. Drawing on award-winning design ideas for revitalizing Long Island, she offers valuable models not only for U.S. suburbs but also those emerging elsewhere with global urbanization. Williamson argues that suburbia has historically been a site of great experimentation and is currently primed for exciting changes. Today, dead malls, aging office parks, and blighted apartment complexes are being retrofitted into walkable, sustainable communities. Williamson shows how to expand this trend, highlighting promising design strategies and tactics. She provides a broad vision of suburban reform based on the best schemes submitted in Long Island's highly successful Build a Better Burb competition. Many of the design ideas and plans operate at a regional scale, tackling systems such as transit, aquifer protection, and power generation. While some seek to fundamentally transform development patterns, others work with existing infrastructure to create mixed-use, shared networks. *Designing Suburban Futures* offers concrete but visionary strategies to take the sprawl out of suburbia, creating a vibrant new suburban form. It will be especially useful for urban designers, architects, landscape architects, land-use planners, local policymakers, and NGOs, citizen activists, students of urban design, planning, architecture, and landscape architecture.
