Tourism and Citizenship Raoul Bianchi, Marcus Stephenson, 2014-02-24 More than sixty years since the 1948 Universal Declaration of Human Rights first enshrined the right to freedom of movement in an international charter of human rights the issue of mobility and the right to tourism itself have become increasingly significant areas of scholarly interest and political debate However despite the fact that cross border travel implies certain citizenship rights as well as the material capacity to travel the manifold intersections between tourism and citizenship have not received the attention they deserve in the literature This book endeavours to fill this gap by being the first to fully examine the role of tourism in wider society through a critically informed sociological reflection on the unfolding relationships between international tourism and distinct renderings of citizenship with particular emphasis on the ideological and political alignments between the freedom of movement and the right to travel The text weaves its analysis of citizenship and travel in the context of addressing large scale societal transformations engendered by globalization neoliberalism and the geopolitical realignments between states as well as comprehending the internal reconfiguring of the relationship between citizens and states themselves By doing so it focuses on key themes including tourism and social citizenship rights race culture and minority rights states markets and the freedom of movement tourism peace and geo politics consumerism and class and ethical tourism global citizenship and cosmopolitanism The book concludes that the advancement of genuinely democratic and just forms of tourism must be commensurate with demands for distributive justice and a democratic politics of mobility encompassing all of humanity This timely and significant contribution to the sociology and politics of international tourism through the lens of citizenship is a must read for students and scholars in both in the fields of tourism and social science The royalties received from this book will be donated to the International Porter Protection Group

The Road to

Citizenship Sofya Aptekar, 2015-03-18 Between 2000 and 2011 eight million immigrants became American citizens. In naturalization ceremonies large and small these new Americans pledged an oath of allegiance to the United States, gaining the right to vote, serve on juries, and hold political office, access to certain jobs, and the legal rights of full citizens. In *The Road to Citizenship*, Sofya Aptekar analyzes what the process of becoming a citizen means for these newly minted Americans and what it means for the United States as a whole. Examining the evolution of the discursive role of immigrants in American society from potential traitors to morally superior supercitizens, Aptekar's in-depth research uncovers considerable contradictions with the way naturalization works today. Census data reveal that citizenship is distributed in ways that increasingly exacerbate existing class and racial inequalities at the same time that immigrants' own understandings of naturalization defy accepted stories we tell about assimilation. Citizenship and becoming American, Aptekar contends, are debates about immigration that must be broadened beyond the current focus on borders and documentation to include larger questions about the definition of citizenship. Aptekar's work brings into sharp relief key questions about the overall system: does the current naturalization process accurately reflect our priorities as a nation and reflect the values we wish to instill in new residents and citizens? Should barriers to full membership in the American polity be lowered? What are the implications of keeping the process the same or changing it? Using archival research, interviews, analysis of census and survey data, and participant observation of citizenship ceremonies, *The Road to Citizenship* demonstrates the ways in which naturalization itself reflects the larger operations of social cohesion and democracy in America.

Language, Immigration and Naturalization Ariel Loring, Vaidehi Ramanathan, 2016-04-20 This volume focuses on the everyday legalities and practicalities of naturalization, including governmental processes, the language of citizenship tests and classes, the labelling and lived experiences of immigrants, outsiders, and the media's interpretation of this process. The book brings together scholars from a wide range of specialties who accentuate language and raise issues that often remain unarticulated or masked in the media. The contributors highlight how governmental policies and practices affect native-born citizens and residents differently on the basis of legal status. Furthermore, the authors observe that many issues that are typically seen as affecting immigrants, such as language policies, nationalist identities, and feelings of belonging, also impact first-generation native-born citizens who are seen as or see themselves as outsiders.

Rogers,2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens Civic Education in the Twenty First Century brings together scholars from various disciplines to show how such a United States is possible today Inspired by

Alexis de Tocqueville's analysis of American democracy in the early 1800s this edited volume represents a multidimensional evaluation of civic education in its new and varied forms While some lament a civics crisis in America today Civic Education in the Twenty First Century raises hope that we can have an informed and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the country The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America's educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry Finally the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them From the virtual civics campus of Fort Hayes State to citizens academies throughout the country this section shows the possibilities for schools today to once again be civics actors and promoters

School Choice, Race and Social Anxiety Anthony E. Healy, 2021-11-29 Based on a carefully contextualized and critical study this book tells how France's dominant social and political ideology and prevailing cultural conventions abate the effects of race and anxiety within school choice here focused on public school middle class parents living among immigrants in the diverse Paris suburbs The study employs

innovative techniques to tackle the presence of race a difficult topic in France and to address the impact of global risk from which social anxiety springs Interviews for this book took place when a wave of deadly terrorism mass migration of refugees and the divisiveness of a presidential election made topics around the study poignant It demonstrates how race operates in French education policy and practices by directing attention to how experienced and more qualified teachers move over their careers to less diverse schools seen by teachers as having better students The book explores how social anxiety created through global risk is culturally resisted within the French context by viewing this resistance theoretically through parental dispositions It presents the racist perception in French school choice by revealing the education policies and parental choices that often segregate immigrants into schools with inexperienced and unqualified teachers This book will be of interest to academics at upper level undergraduate as well as graduate courses policymakers educators who are interested in inequality sociology of education transnational and critical perspectives on race schooling and school choice
