Resources in Education, 2001 Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher

workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

The Rise and Fall of Civic Education Michael Learn, 2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because

policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America s divisive politics fight to control the narrative of the disciplines within social studies Research in Education ,1970
