Us New And World Report Find A College:

Follow Your Interests to Find the Right College Janet Mathers, Paul Marthers, 2016 **U.S. News & World Report**, 2008 **Breaking Ranks** Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality **Planning For Higher Education** Allan O. Pfnister, 2019-06-10 This book focuses on some of the last decade s more significant writing about developments in higher education planning organizing the wide ranging commentaries and studies to show the administrator the faculty member and the informed layman what the current status of higher education appears to be The College Devaluation Crisis Jason Wingard, 2022-08-02 Employers are stepping in to innovate new approaches to training talent that increasingly operates independently of the higher education sector The value proposition of the college degree long the most guaranteed route to professional preparation for work is no longer keeping pace with rapidly evolving skill needs that derive from technological advancements impacting today s work force If the university system does not engage in responsive restructuring more and more workplaces will bypass them entirely and instead identify alternative sources of training that equip learners with competencies to directly meet dynamic needs The College Devaluation Crisis makes the case that employers and other learning and development entities are emerging to innovate new approaches to training talent that at times relies on the higher education sector but increasingly operates independently in order to satisfy talent needs more agilely and effectively Written primarily for managers the book focuses on

case studies from leading companies including Google Ernst Young and General Assembly to illustrate their innovative strategies for talent development across varying levels of individual education age and background The book also addresses professionals on the university side urging readers to consider the question Will higher education pivot and adapt or will it resist change and therefore be replaced

The Economics of Higher Education in the United States Thomas Adam,Ayten Burcu Bayram,2019-03-27 In The Economics of Higher Education in the United States editors Thomas Adam and A Burcu Bayram have assembled five essays adapted from the fifty second annual Walter Prescott Webb Memorial Lecture Series that focus on the increasing cost of college a topic that causes great anxiety among students parents faculty administrators legislators and taxpayers Essays focus on the funding of colleges the funding of professional schools and the provision of scholarships and student loans for undergraduate students to reveal the impact of money on the structure of institutions of higher education and the organization of colleges The cost of higher education has risen dramatically as both states and the federal government have significantly lowered their contributions to offset that cost With rising tuition and cost of living on top of a growing student population too many graduates find themselves in financial trouble after earning their undergraduate degree Mounting student debt prevents an increasing number of young professionals from embarking on the very life for which their education was supposed to prepare them How have we come from a political environment in which higher education was perceived as a public good normally free to the user to an environment in which higher education is seen as a privilege subject primarily to market forces The Economics of Higher Education in the United States offers a desperately needed analysis in an attempt to understand and tackle this looming problem *The College Courant* ,1869

The College Buzz Book Carolyn C. Wise,Stephanie Hauser,2007-03-26 Many guides claim to offer an insider view of top undergraduate programs but no publisher understands insider information like Vault and none of these guides provides the rich detail that Vault s new guide does Vault publishes the entire surveys of current students and alumni at more than 300 top undergraduate institutions Each 2 to 3 page entry is composed almost entirely of insider comments from students and alumni Through these narratives Vault provides applicants with detailed balanced perspectives The Educational Times, and Journal of the College of Preceptors ,1913
