The Israel Lobby and U.S. Foreign Policy John J. Mearsheimer, Stephen M. Walt, 2007-09-04 Originally published in 2007 The Israel Lobby and U S Foreign Policy by John Mearsheimer of the University of Chicago and Stephen M Walt of Harvard's John F Kennedy School of Government provoked both howls of outrage and cheers of gratitude for challenging what had been a taboo issue in America the impact of the Israel lobby on U S foreign policy A work of major importance it remains as relevant today as it was in the immediate aftermath of the Israel Lebanon war of 2006 Mearsheimer and Walt describe in clear and bold terms the remarkable level of material and diplomatic support that the United States provides to Israel and argues that this support cannot be fully explained on either strategic or moral grounds This exceptional relationship is due largely to the political influence of a loose coalition of individuals and organizations that actively work to shape U S foreign policy in a pro Israel direction They provocatively contend that the lobby has a far reaching impact on America's posture throughout the Middle East in Iraq Iran Lebanon and toward the Israeli Palestinian conflict and the policies it has encouraged are in neither America's national interest nor Israel's long term interest The lobby's influence also affects America's relationship with important allies and increases dangers that all states face from global jihadist terror The publication of The Israel Lobby and U S Foreign Policy led to a sea change in how the U S Israel relationship was discussed and continues to be one of the most talked about books in foreign policy

From Pablo to Osama

Michael Kenney, 2007-02-28 *From Pablo to Osama* is a comparative study of Colombian drug smuggling enterprises terrorist networks including al Qaeda and the law enforcement agencies that seek to dismantle them Drawing on a wealth of research materials including interviews with former drug traffickers and other hard to reach informants Michael Kenney explores how drug traffickers terrorists and government officials gather analyze and apply knowledge and experience The analysis reveals that the resilience of the Colombian drug trade and Islamist extremism in wars on drugs and terrorism stems partly from the ability of illicit enterprises to change their activities in response to practical experience and technical information store this knowledge in practices and procedures and select and retain routines that produce satisfactory results Traffickers and terrorists learn building skills improving practices and becoming increasingly difficult for state authorities to eliminate The book concludes by exploring theoretical and policy implications suggesting that success in wars on drugs and terrorism

depends less on fighting illicit networks with government intelligence and more on conquering competency traps that compel policy makers to exploit militarized enforcement strategies repeatedly without questioning whether these programs are capable of producing the intended results *State of the World 2004* Worldwatch Institute, 2014-04-08 *State of the World 2004* takes a fresh look at the trends that have put the global economy on a collision course with the Earth's ecosystems. This year's edition has a special focus on the theme of consumption. It questions whether a less consumptive society is possible and concludes that it is essential. The book explores overconsumption as a by-product of affluence and underconsumption linked to poverty and provides behind-the-scenes exposes of the devastating environmental impacts of some of our most popular products from plastic bags to paper to mobile phones. Published annually in 28 languages, each edition draws on the breadth of expertise of Worldwatch's award-winning team of writers and researchers. *State of the World* is relied upon by national governments, UN agencies, development workers, and law makers for its authoritative and up-to-the-minute analysis and information. It is essential for anyone concerned with building a positive global future. **Balancing Acts** Mary Taylor Huber, 2023-07-03 Drawing on interviews with Dan Bernstein (psychology, University of Nebraska), Brian Coppola (chemistry, University of Michigan), Sheri Sheppard (mechanical engineering, Stanford University), Randy Bass (American literature, Georgetown University), and colleagues within and outside their institutions and fields, the author looks at the routes these pathfinders have traveled through the scholarship of teaching and learning and at the consequences that this unusual work has had for the advancement of their careers, especially tenure and promotion. Failing Law Schools Brian Z. Tamanaha, 2012-06-15

On the surface law schools today are thriving Enrollments are on the rise and their resources are often the envy of every other university department Law professors are among the highest paid and play key roles as public intellectuals advisers and government officials Yet behind the flourishing facade law schools are failing abjectly Recent front page stories have detailed widespread dubious practices including false reporting of LSAT and GPA scores misleading placement reports and the fundamental failure to prepare graduates to enter the profession Addressing all these problems and more in a ringing critique is renowned legal scholar Brian Z Tamanaha Piece by piece Tamanaha lays out the how and why of the crisis and the likely consequences if the current trend continues The out of pocket cost of obtaining a law degree at many schools now approaches 200 000 The average law school graduate's debt is around 100 000 the highest it has ever been while the legal job market is the worst in decades with the scarce jobs offering starting salaries well below what is needed to handle such a debt load At the heart of the problem Tamanaha argues are the economic demands and competitive pressures on law schools driven by competition over U S News and World Report ranking When paired with a lack of regulatory oversight the work environment of professors the limited information available to prospective students and loan based tuition financing the result is a system that is fundamentally unsustainable Growing concern with the crisis in legal education has led to high profile coverage in the Wall Street Journal and the New York Times and many observers expect it soon will be the focus of congressional scrutiny Bringing to the table his years of experience from within the legal academy Tamanaha has provided the perfect resource for assessing what's wrong with law schools and figuring out how to fix them
