[A Perfect Mess](#) David F. Labaree, 2017-04-21 A history of higher education in America and an investigation into the secrets of its success A Perfect Mess should become a classic Times Higher Education Read about America s colleges and universities rising student debt affirmative action debates conflicts between faculty and administrators and it s clear that higher education in this country is a total mess But as David F Labaree reminds us in this book it s always been that way And that s exactly why it has become the most successful and sought after source of learning in the world Detailing American higher education s unusual struggle for survival in a free market that never guaranteed its place in society a fact that seemed to doom it in its early days in the nineteenth century he tells a lively story of the entrepreneurial spirit that drove American higher education to become the best And the best it is today America s universities and colleges produce the most scholarship earn the most Nobel prizes hold the largest

endowments and attract the most esteemed students and scholars from around the world But this was not an inevitability In their early years weakly funded American schools had to rely on student tuition and alumni donations to survive This gave them tremendous autonomy to seek out sources of financial support and pursue unconventional opportunities As Labaree shows by striving mightily to meet social needs and fulfill individual ambitions they developed a broad base of political and financial support that grounded by large undergraduate programs allowed for the most cutting edge research and advanced graduate study ever conducted As a result American higher education eventually managed to combine a unique mix of the populist the practical and the elite in a single complex system The answers to today s problems in higher education are not easy but as this book shows they shouldn t be No single person or institution can determine higher education s future It is something that faculty administrators and students adapting to society s needs will determine together just as they have always done

The College Completion Glass—Half-Full or Half-Empty? Tiffany Beth Mfume, 2018-12-21 Despite the Great Recession and looming student loan debt crisis college education remains the most proven invaluable lifetime investment and serves as the most reliable path to upward mobility and socioeconomic class reassignment Mfume suggests that the value added of even one year of college can be transformative As higher education professionals and partners continue to advocate for new and improved college retention and graduation measures The College Completion Glass Half Full or Half Empty Exploring the Value of Postsecondary Education presents a new paradigm for higher education one that focuses on the value added of postsecondary education as well as on student success beyond the traditional measure of college graduation rates a model which merges conventional practices and supports for students with non traditional partnerships with and advocacy from successful non completers

The Abundant University Michael D. Smith, 2023-09-19 Why our current system of higher education is financially and morally unsustainable and how to address the crisis with the creative implementation of digital technologies For too long our system of higher education has been defined by scarcity scarcity in enrollment scarcity in instruction and scarcity in credentials In addition to failing students professionally this system has exacerbated social injustice and socioeconomic stratification across the globe In The Abundant University Michael D Smith argues that the only way to create a financially and morally sustainable higher education system is by embracing digital technologies for enrolling instructing and credentialing students the same technologies that we have seen create abundance in access to resources in industry after industry The Abundant University explains how we got our current system why it s such an expensive inefficient mess and how a system based on exclusivity cannot foster inclusivity Smith challenges the resistance to digital technologies that we have already seen among numerous institutions citing the examples of faculty resistance toward digital learning platforms While acknowledging the understandable self preservation instinct of our current system of residential education Smith makes a case for how technology can engender greater educational opportunity and create changes that will benefit students employers and society as a whole
