Restoring and Protecting Marine Habitat Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Marine Board, 1994-02-01

Tremendous changes have occurred this century in the nation's coastal habitats in the way society views them and in the way they are managed. This volume offers a complete, highly readable assessment of how scientific knowledge and coastal engineering capabilities can be more effectively used to protect and restore marine habitat. It addresses traditional and innovative uses of technology to protect remaining natural marine habitats, to enhance or restore those that have been altered, and to create marine habitat from lands used for other purposes. The use of dredged materials as a vital resource in protection and restoration work is explored. The book also explores organizational management and regulatory barriers to using the best available technology and engineering practice. Specific options for improvements are offered in each area.

Methods of Environmental and Social Impact Assessment Riki Therivel, Graham Wood, 2017-09-13. Environmental and social impact assessment (ESIA) is an important and often obligatory part of proposing or launching any development project. Delivering a successful ESIA needs not only an understanding of the theory but also a detailed knowledge of the methods for carrying out the processes required. Riki Therivel and Graham Wood bring together the latest advice on best practice from experienced practitioners to ensure an ESIA is carried out effectively and efficiently. This new edition explains how an ESIA works and how it should be carried out, demonstrates the links between socio-economic, cultural, environmental, and ecological systems, and assessments. It incorporates the World Bank's IFC performance standards and best practice examples from developing as well as developed countries. Includes new chapters on emerging ESIA topics such as climate change, ecosystem services, cultural impacts, resource efficiency, land acquisition, and involuntary resettlement. Invaluable to undergraduate and MSc students of ESIA, on planning, ecology, geography, and environment courses, this internationally oriented fourth edition of *Methods of Environmental and Social Impact Assessment* is also of great use to planners, ESIA practitioners, and professionals seeking to update their skills.

Coastal Flood Risk Reduction Samuel Brody, Yoonjeong Lee, Baukje Kothuis, 2022-04-27. Coastal Flood Risk Reduction: The Netherlands and the U.S. Upper Texas Coast represents the culmination of a 5-year international research and education partnership funded by the US National Science Foundation (NSF) and more than 10 years of collaboration between Dutch and U.S. flood experts on the basic issue of how to protect society from growing flood risks. Multiple case studies integrating the fields of engineering, hydrology, landscape architecture, economics, and planning address the underlying characteristics of physical flood risks and their prediction, human communities, and the associated built environment. Physical, social, and built environment variables and mitigation techniques. In recognition of the lack of systematic research and the growing societal need to better understand flood impacts, this edited book provides an in-depth comparative evaluation of flood problems and solutions in two key places: the Netherlands and the U.S. Upper Texas Coast. Both regions are extremely flood-prone and have experienced continual adverse impacts throughout their histories. For researchers in flood management, geographers, hydrologists, environmental studies, and social science, as well as policymakers and decision makers in flood management authorities and related industries, this book provides an

essential resource Introduces integrated comparative work on flood risk reduction and management across disciplines and international boundaries Presents chapters written by dozens of experts across six U S and Dutch universities that have formally participated in the international research and education program funded by the U S National Science Foundation NSF Provides a basis for understanding and mitigating flood risk over a range of necessary perspectives from modeling inputs to design solutions Integrates cutting edge scientific methods and state of the art knowledge with examples of specific solutions and how they are being implemented in each national case study Manteo (Shallowbag) Bay Project , Navigation Channel Deepening ,1999 **Alternative Energy Development and Production and Alternate Use of Facilities on the Outer Continental Shelf** ,2007 **Lock Gates and Other Closures in Hydraulic Projects** Ryszard Daniel,Tim Paulus,2018-11-27 Lock Gates and Other Closures in Hydraulic Projects shares the authors practical experience in design engineering management and other relevant aspects with regard to hydraulic gate projects This valuable reference on the design construction operation and maintenance of navigation lock gates movable closures of weirs flood barriers and gates for harbor and shipyard docks provides systematic coverage on all structural types of hydraulic gates the selection of gate types and their advantages and disadvantages The discussion includes the latest views in new domains such as environmental impact of hydraulic gate projects sustainability assessments relation with the issues of global climate change handling accidents and calamities and the bases of asset management Heavily illustrated this reference provides a generous amount of case studies based on the author s own and their colleagues experiences from recent projects in Europe America and other continents Presents extensive coverage of the operational profiles of hydraulic closures including gates in navigation locks movable closures on river weirs closures of flood barriers spillway closures and valves and more Outlines the different structural types of hydraulic gates including miter gates vertical lift gates flap and hinged crest gates radial gates rolling and barge gates sector gates and many other Clearly outlines the selection process for gates for navigation locks river weirs flood barriers hydroelectric plants shipyard docks and other hydraulic structures Provides comprehensive discussion of design loads and other actions to which hydraulic gates may be subjected during their service life followed by an overview of analysis methods and tools Addresses the newest challenges and concerns in hydraulic gate projects such as environmental impact of hydraulic gate projects risk based design sustainability issues handling accidents and calamities and gate maintenance in view of asset management Presents the experiences from many recent projects in Europe and America including the rolling gates in large European sea locks gates in the Panama Canal new locks flood barriers in New Orleans and the Netherlands **Informatics, Networking and Intelligent Computing** Jiaying Zhang,2015-05-06 This proceedings volume contains selected papers presented at the 2014 International Conference on Informatics Networking and Intelligent Computing held in Shenzhen China Contributions cover the latest developments and advances in the field of Informatics Networking and Intelligent Computing Oceans and Aquatic Ecosystems - Volume II Eric Wolanski,2009-10-20
