Teaching and Learning at a Distance Michael Simonson,Sharon Smaldino,Susan M. Zvacek,2014-10-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book was the importance of research to the development of the contents of the book The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a distance is derived from Richard Clark s famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn Distance delivered instruction is not a magical

approach that makes learners achieve more The fourth theme of the book is equivalency theory Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field

Corruption in Higher Education Elena Denisova-Schmidt, 2020-06-08 The lack of academic integrity combined with the prevalence of fraud and other forms of unethical behavior are problems that higher education faces in both developing and developed countries at mass and elite universities and at public and private institutions While academic misconduct is not new massification internationalization privatization digitalization and commercialization have placed ethical challenges higher on the agenda for many universities Corruption in academia is particularly unfortunate not only because the high social regard that universities have traditionally enjoyed but also because students young people in critical formative years spend a significant amount of time in universities How they experience corruption while enrolled might influence their later personal and professional behavior the future of their country and much more Further the corruption of the research enterprise is especially serious for the future of science The contributors to Corruption in Higher Education Global Challenges and Responses bring a range of perspectives to this critical topic

Teaching Undergraduate Research in Religious Studies Bernadette McNary-Zak, Rebecca Todd Peters, 2011-09-14 This text offers an introduction to the philosophy and practice of undergraduate research in religious studies and takes up several significant ongoing questions related to it

Handbook of Academic Integrity Sarah Elaine Eaton, 2023-12-04 The book brings together diverse views from around the world and provides a comprehensive overview of academic integrity and how to create the ethical academy At the same time the Handbook does not shy away from some of the vigorous debates in the field such as the causes of academic integrity breaches There has been an explosion of interest in academic integrity in the last 20 30 years New technologies that have made it easier than ever for students to cut and paste coupled with global media scandals of high profile researchers behaving badly have resulted in the perception that plagiarism is on the rise This in combination with the massification and commercialisation of higher education has resulted in a burgeoning interest in the importance of academic integrity how to safeguard it and how to address breaches appropriately What may have seemed like a relatively easy topic to address students copying sources without attribution has in fact turned out to be a complex interdisciplinary field of research requiring contributions from linguists psychologists social scientists anthropologists teaching and learning specialists mathematicians accountants medical doctors lawyers and philosophers to name just a few Because of this broad interest and input this handbook serves as the single authoritative reference work which brings together the vast growing

interdisciplinary and at times contradictory body of literature For both established researchers practitioners and those new to the field this Handbook provides a one stop shop as well as a launching pad for new explorations and discussions *ABA Journal* ,1973-02 The ABA Journal serves the legal profession Qualified recipients are lawyers and judges law students law librarians and associate members of the American Bar Association
