EuroTragedy Ashoka Mody,2018-05-01 Blending economic analysis with political drama EuroTragedy chosen by both Foreign Affairs and The Financial Times as one of the best books of 2018 is a groundbreaking account of the euro s history and tragic consequences In this vivid and compelling chronicle Ashoka Mody describes how the euro improbably emerged through a narrow historical window as a flawed compromise wrapped in a false pro European rhetoric of peace and unity Drawing on his frontline experience as an official with the IMF Mody situates the tragedy in a fast paced global context and guides the reader through the forced and unforced errors Eurozone authorities committed during their long financial crisis The decision to switch from national currencies to the euro unfolded as both economic and political tragedy It weakened the growth potential of member states which made financially vulnerable Europeans more anxious It deepened perceptions of unfairness and widened the division between nations Now the burden falls on younger Europeans a generation with a discouragingly bleak future A compassionate view of European possibilities EuroTragedy makes clear that the euro s structural flaws will continue to haunt the continent Instead of centralizing authority to prop up an ossified pro Europeanist model it is time to loosen ties that bind too tightly so that a liberal order can once more flourish Now updated to cover the most momentous events since original publication this will remain the authoritative book on the crisis

Unfinished Business Tamim Bayoumi, 2017-09-19 A penetrating critique tracing how under regulated trading between European and U S banks led to the 2008 financial crisis with a prescription for preventing another meltdown There have been numerous books examining the 2008 financial crisis from either a U S or European perspective Tamim Bayoumi is the first to explain how the Euro crisis and U S housing crash were in fact parasitically intertwined Starting in the 1980s Bayoumi outlines the cumulative policy errors that undermined the stability of both the European and U S financial sectors highlighting the catalytic role played by European mega banks that exploited lax regulation to expand into the U S market and financed unsustainable bubbles on both continents U S banks increasingly sold sub par loans to under regulated European and U S shadow banks and when the bubbles burst the losses whipsawed back to the core of the European banking system A much needed fresh look at the origins of the crisis Bayoumi s analysis concludes that policy makers are ignorant of what still needs to be done both to complete the cleanup and to prevent future crises

Yojana , 2014 **Against the Seas** Mary Soderstrom, 2023-02-28 An incredible read While unflinching in her analysis Soderstrom nevertheless gifts us with a message of hope and resilience MAUDE BARLOW activist and author of Still Hopeful

Lessons from a Lifetime of Activism What can we learn about coping with rising sea levels from ancient times The scenario we are facing is scary within a few decades sea levels around the world may well rise by a metre or more as glaciers and ice caps melt due to climate change Large parts of our coastal cities will be flooded the basic outline of our world will be changed and torrential rains will present their own challenges But this is not the first time that people have had to cope with threatening waters because sea levels have been rising for thousands of years ever since the end of the last Ice Age Stories told by the Indigenous people in Australia and on the Pacific coast of North America and those found in the Bible and the Epic of Gilgamesh as well as Roman and Chinese histories all bear witness to just how traumatic these experiences were The responses to these challenges varied people adapted by building dikes canals and seawalls by resorting to prayer or magic and very often by moving out of the way of the rushing waters Against the Seas explores these stories as well as the various measures being taken today to combat rising waters focusing on five regions Indonesia Shanghai the Sundarbans of Bangladesh the Salish Sea and the estuary of the St Lawrence River What happened in the past and what is being tried today may help us in the future and if nothing else give us hope that we will survive

Middle Powers and Regional Influence Joshua B. Spero,2018-11-16 In the growing literature on middle powers this book contributes by expanding case study analysis and extending international relations theory in its application to foreign policy decisions Thus this book builds on prominent middle power literature and aims to advance our theoretical understanding for why crucial foreign policies were made by the pivotal middle powers this book examines Poland South Korea and Bolivia For

this book's three case studies and their first term leadership's critical junctures from first term post communist Poland post authoritarian post ruling party South Korea and post colonial Bolivia we have the antecedents for contemporary middle powers essential for realizing the regional evolution for cooperative change with greater powers systemically we may then grasp today why those historical foreign policies albeit not so long ago give us crucial antecedents for adapting and trying yet again to resolve seemingly perennial power dilemmas regionally peacefully Here are why middle power impact matters not only regionally for stronger dominant greater power neighbours but also for transformative middle power leaderships which proved pivotal geopolitically for their region's challenges and changes

The Rise and Fall of Civic Education Michael Learn, 2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America's divisive politics fight to control the narrative of the disciplines within social studies

startling improvement in Chinese air and naval capabilities over the last decade or so This timely study sets out to assess the implications of this shift for the long established U S military presence in Asia and the Pacific This presence is anchored in a complex basing infrastructure that scholars and Americans generally too often take for granted In remedying this state of affairs this volume offers a detailed survey and analysis of this infrastructure its history the political complications it has frequently given rise to and its recent and likely future evolution American seapower requires a robust constellation of bases to support global power projection Given the rise of China and the emergence of the Asia Pacific as the center of global economic growth and strategic contention nowhere is American basing access more important than in this region Yet manifold political and military challenges stemming not least of which from rapidly improving Chinese long range precision strike capabilities complicate the future of American access and security here This book addresses what will be needed to maintain the fundamentals of U S seapower and force projection in the Asia Pacific and where the key trend lines are headed in that regard This book demonstrates that U S Asia Pacific basing and access is increasingly vital yet increasingly vulnerable It demands far more attention than the limited coverage it has received to date and cannot be taken for granted More must be done to preserve capabilities and access upon which American and allied security and prosperity depend **Race,**
