Educational Leadership, Management, and Administration through Actor-Network Theory Paolo Landri, 2020-11-05
Educational Leadership Management and Administration through Actor Network Theory presents how actor network theory (ANT) and the related vocabularies have much to offer to a critical re-imagining of the dynamics of management in education and educational leadership. It extends the growing contemporary perspective of ANT into the study of educational administration and management. This book draws on case studies focusing on new configurations of educational management and leadership. It presents new developments of ANT: After ANT and Near ANT, and clarifies how these sensibilities can contribute to thinking critically and intervening in the current dynamics of education. The book proposes that ANT can offer an ecological understanding of educational leadership which is helpful in abandoning the narrow humanistic world of managerialism, considering a post anthropocentric scenario where it is necessary to compose together new liveable assemblages of humans and nonhumans. This book will be of great interest to academics, scholars and post graduate students in the fields of educational management, leadership and administration, as well as education policy. It will also be highly relevant to policy makers and experts of education policy at the national, European and international levels.
