Gyrfalcon Norman Barichello, 2020-03-13 Gyrfalcons and humans have shared a remarkable relationship since prehistoric times These extraordinary arctic falcons have been revered coveted as an item of commerce persecuted and enjoyed as a spectacle of sport for at least ten thousand years Today climate change has brought new challenges with habitat in the far north changing rapidly as natural cycles begin to break down Drawn from over thirty years of study and observation this in depth study provides a comprehensive view of the gyrfalcon s place in the arctic ecosystem including their inextricable link to their primary prey the ptarmigan and their antagonistic relationship with golden eagles It explores the connection the bird has had with humanity in both legend and practice and the challenges it faces as its habitat continues to change This definitive look at the gyrfalcon shows us both sides of the majestic bird the master of its domain and a threatened species facing an uncertain future **Australian Falcons** Stephen Debus, 2022-11-02 Falcons are stunning and iconic birds Australia has six falcon species with two endemic to the continent and two others endemic to the Australasian region They are important indicators of the health of our ecosystems due to their position at the top of the food chain But several species are declining with two species threatened in some states In *Australian Falcons Ecology Behaviour and Conservation* Dr Stephen Debus provides a 30 year update of knowledge on these six species as well as a falcon like hawk the

Black shouldered Kite This book is based partly on the author s field studies as well as being a supplement to the Handbook of Australian New Zealand and Antarctic Birds HANZAB and recent global treatises It offers up to date information on the Australian species including their behaviours ecology and biology It reviews their population status and threats and suggests what needs to be done to ensure the future of these spectacular birds Australian Falcons is an invaluable resource for raptor biologists birdwatchers wildlife rescuers and carers raptor rehabilitators and zookeepers **Falcon** Helen

Macdonald,2016-11-15 Before best selling author Helen Macdonald told the story of the goshawk in H Is for Hawk she told the story of the falcon in a cultural history of the masterful creature that can cut the sky in two with the perfectly aerodynamic profile of a raindrop as she so incisively puts it In talon sharp prose she explores the spell the falcon has had over her and by extension all of us whether we ve seen them through binoculars framed on gallery walls versified by poets flown as hunting birds through Manhattan windows sewn on flags stamped on badges or winnowing through the clouds over abandoned arctic radar stations Macdonald dives through centuries and careens around the globe to tell the story of the falcon as it has flown in the wild skies of the natural world and those of our imagination Mixing history myth and legend she explores the long history of the sport of falconry in many human cultures from Japan to Abu Dhabi to Oxford she analyzes the falcon s talismanic power as a symbol in art politics and business and she addresses the ways we have both endangered and protected it Along the way we discover how falcons were mobilized in secret military projects their links with espionage the Third Reich the Holy Roman Empire and space programs and how they have figured in countless stories of heroism and of course the erotic Best of all Macdonald has given us something fresh a new introduction that draws on all her experience to even further invigorate her cherished subject The result is a deeply informed book written with the same astonishing lyrical grace that has captivated readers and had everyone talking about this writer cum falconer **Rulers and Raptors** Nadir

Weber,2025-10-01 Rulers and Raptors argues that by studying animal biographies we gain a new perspective on early modern court society Combining court studies and historical animal studies it brings together two vibrant but rarely combined fields of research and shows how the presence of non human creatures shaped everyday life and political representation in Europe s dynastic centres Through an in depth analysis of the symbolic and practical functions of birds of prey in courtly life the book demonstrates that in the seventeenth and eighteenth centuries falconry was much more than a hunting technique it served as a model for the mutual empowerment of the sovereign and his noble subjects the essence of the Baroque style of government that gave rise to European court society Weber pays close attention to the birds life trajectories and thereby shines a spotlight on a large network of agents including rural bird catchers bourgeois animal traders and noble falconers at court who made the aerial spectacles possible Focusing on these peoples interactions with the raptors the book proposes to rethink early modern human animal relations showing that falcons escaped clear distinctions between wild and domestic nature and civilization The book thus simultaneously shows how early modern European rulers

valued raptors as a key symbol of their power and how this very symbol of monarchical sovereignty pointed to the limits of human control over the animal kingdom on the eve of the Anthropocene This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations
