The Organic Medicinal Herb Farmer Jeff Carpenter, Melanie Carpenter, 2015. A new approach to growing local medicine including information on geo authenticity, wildcrafting and developing a good business plan. Both a business guide and a farming manual. The Organic Medicinal Herb Farmer will teach readers how to successfully grow and market organic medicinal Western herbs. Whether you're trying to farm medicinal plants, culinary herbs or at-risk native herbs exclusively or simply add herbal crops to what you're already growing, successful small-scale herb farmers Jeff and Melanie Carpenter will guide you through the entire process from cultivation to creating value-added products. Using their Zack Woods Herb Farm in Vermont as a backdrop, the Carpenters cover all the basic practical information farmers need to know to get an organic herb farm up and running, including size and scale considerations, layout and design of the farm and facilities, growing and cultivation information including types of tools, field and bed prep, plant propagation, weed control and pests and diseases, harvesting as well as wild harvesting and the concept of geo-authentic botanicals, postharvest processing and value-added products and marketing. The authors also provide fifty detailed plant profiles going deeper into the herbs every farmer should consider growing. In an easy-to-understand, practical and comprehensive manner, readers will learn how to focus on quality over quantity and keep costs down by innovating with existing equipment rather than expensive technology. Market farmers who have never before considered growing medicinal herbs will learn why it's more important to produce these herbs domestically. The Organic Medicinal Herb Farmer makes a convincing case that producing organic medicinal herbs can be a viable, profitable farming enterprise. The Carpenters also make the case for incorporating medicinal herbs into existing operations as it can help increase revenue in the form of value-added products, not to mention improve the ecological health of farmland by encouraging biodiversity as a path toward greater soil health.

Planting the Future Rosemary Gladstar, Pamela Hirsch, 2000-09. Planting the Future shows how land stewardship, habitat protection and sustainable cultivation are of critical importance to ensure an abundant, renewable supply of medicinal plants for future generations.

The Business of Botanicals Ann Armbricht, 2021-02-25. From tulsi to turmeric, echinacea to elderberry, medicinal herbs are big business, but do they deliver on their healing promise to those who consume them, those who provide them and the natural world? An eye opener, Armbricht challenges ideas of what medicine can be and how business practices can corrupt and expand our notions of plant-based healing. The Boston Globe: So deeply honest, sincere, heartfelt, questioning and brilliant. *The Business of Botanicals* is an amazing book that plunges in and takes a deepening look at those places where people don't often venture. Rosemary Gladstar, author of *Rosemary Gladstar's Medicinal Herbs*. For those who loved *Braiding Sweetgrass*, this book is a perfect opportunity to go deeper into understanding the complex and co-evolutionary journey of plants and people. Angela McElwee, former president and CEO of Gaia Herbs. Using

herbal medicines to heal the body is an ancient practice but in the twenty first century it is also a worldwide industry Yet most consumers know very little about where those herbs come from and how they are processed into the many products that fill store shelves In *The Business of Botanicals* author Ann Armbrrecht follows their journey from seed to shelf revealing the inner workings of a complicated industry and raises questions about the ethical and ecological issues of mass production of medicines derived from these healing plants many of which are imperiled in the wild This is the first book to explore the interconnected web of the global herb industry and its many stakeholders and is an invaluable resource for conscious consumers who want to better understand the social and environmental impacts of the products they buy Armbrrecht masterfully manages the challenges and complexity of her source material She is a spirited storyteller and presents all this with the skill of an anthropologist and the heart of an herbalist *Journal of the American Herbalists Guild* *Southern Folk Medicine* Phyllis D. Light, 2018-01-16 For the first time ever an active practitioner describes the history folklore and remedies of Southern and Appalachian Folk Medicine in this groundbreaking guide for curious herbalists This book is the first to describe the history folklore assessment methods and remedies of Southern and Appalachian Folk Medicine the only system of folk medicine other than Native American that developed in the United States One of the system s last active practitioners Phyllis D Light has studied and worked with herbs foods and other healing techniques for more than thirty years In everyday language she explains how Southern and Appalachian Folk Medicine was passed down orally through the generations by herbalists and healers who cared for people in their communities with the natural tools on hand Drawing from Greek Native American African and British sources this uniquely American folk medicine combines what is useful and practical from many traditions to create an energetic system that is coherent and valuable today **Thaddaeus Hagecius, or Hájek,**

Medicine DAVID OYEBOLA MD,2020-02-10 This book is written to provide information on various aspects of Yoruba and indeed African traditional medicine The writer s research on Yoruba traditional medicine provides the bulk of the materials in the book The book consists of eleven chapters Chapters 1 and 2 provide the background to the book Chapters 3 to 10 encapsulate the different aspects of Yoruba traditional medicine such as classification of healers methods of training of healers methods of diagnosis and investigation of diseases treatment of diseases Yoruba pharmacopoeia midwifery bone setting and other forms of traditional surgery Chapter 11 describes the meeting point of hospitals and healers this meeting point in the opinion of the author should be how best to serve the interests of the patients The best form of relationship that should exist between hospitals and healers is also discussed The two systems of medicine exist side by side in Nigeria and most African countries yet remain functionally unrelated in any intentional sense It is argued that no medical system is perfect and no single care system has all the answers to all human health and related problems Each of the two systems has its strong and weak points The often talked about integration of the two systems has potential pitfalls and may be undesirable The book concludes that the best form of relationship may well be one of genuine cooperation and mutual respect between the two systems since this will lead in the ultimate to advancement of medical knowledge and overall improvement of patient care All levels of government in Nigeria have decisive roles to play in achieving this mutually

beneficial cooperation of the two systems
