The Human Age The World Shaped By Us Diane Ackerman:

The Human Age Diane Ackerman, 2014-09-03 Winner of the National Outdoor Book Award and the PEN New England Henry David Thoreau Prize A dazzling inspiring tour through the ways that humans are working with nature to try to save the planet With her celebrated blend of scientific insight clarity and curiosity Diane Ackerman explores our human capacity both for destruction and for invention as we shape the future of the planet Earth Ackerman takes us to the mind expanding frontiers of science exploring the fact that the natural and the human now inescapably depend on one another drawing from fields as diverse as evolutionary robotics nanotechnology 3 D printing and biomimicry New York Times Book Review with probing intelligence a clear eye and an ever hopeful heart

The Origins of the Modern World Robert B. Marks, 2024-01-02 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present Unlike most studies which assume that the rise of the West is the story of the coming of the modern world this history drawing upon new scholarship on Asia Africa and the New World and upon the maturing field of environmental history constructs a story in which those parts of the world play major roles including their impacts on the environment Robert B Marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world increasing inequality within the wealthiest industrialized countries and an escape from the environmental constraints of the biological old regime He explains its origins by emphasizing contingencies such as the conquest of the New World the broad comparability of the most advanced regions in China India and Europe the reasons why England was able to escape from common ecological constraints facing all of those regions by the end of the eighteenth century a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world the mounting environmental crisis that defines the modern world and the ways in which the forces of globalization stress the economic and political underpinnings of the modern world Now in a new edition that brings the saga of the modern world to the present in an environmental context the book considers how and why the United States emerged as a world power in the twentieth century and became the sole superpower by the twenty first century and why the changed relationship of humans to the environment likely will be the hallmark of the modern era the Anthropocene Once again arguing that the US rise to global hegemon was contingent not inevitable Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years

Water Planet Camille Gaskin-Reyes, 2016-10-24 Through case studies opposing viewpoints and primary documents this reference work examines the environmental and sustainability issues regarding water as well as how water is an intrinsic part of human culture Every culture and ecosystem on earth depends on water As the world s climate changes human culture is increasingly threatened by the seemingly opposite problems of having too little clean potable water and having too much water e g flooding melting

polar ice caps and rising sea levels What are the solutions that humanity must collectively pursue to protect our ability to flourish on planet earth Water Planet The Culture Politics Economics and Sustainability of Water on Earth offers an unprecedented examination of the critical subject of water sustainability Its essays viewpoints case studies and documents show how this vital resource that many in first world countries take for granted is intricately woven into not only basic human survival but also cultural political and economic stability Readers will learn about topics such as flooding and drought the growing problem of water pollution the connections between water and gender including gender equity and gender aspects of water ownership the effects of global temperature changes on the water supply concerns regarding fishing and overfishing water security and sustainable water management Big History, Small World Cynthia Stokes Brown, 2016-12-30 The newest way to think about the universe becomes engaging and personal in Big History Small World From the Big Bang to You by Cynthia Stokes Brown Her clear introduction to big history divided into eight thresholds of time is the perfect starting point for any reader intrigued by this rich blend of history and science Big History Small World is also the first book about big history specifically designed to be used in high school courses and with the free curriculum available from the Big History Project cofounded by Bill Gates and David Christian Big History Small World is organized into twelve chapters In the first chapter Brown discusses the scientific method In the last chapter she discusses the different ways people interpret big history and find meaning in it The other ten chapters are based on eight major turning points or thresholds in the cosmic story One threshold the emergence of life gets two chapters while a discussion of the future fills chapter eleven This book is not formatted as a traditional textbook although it can easily be used as one Each chapter has questions on the frontier of knowledge as well as suggestions of how the content applies directly to the reader to answer the perennial question Why do I have to learn this There are illustrations charts diagrams a glossary and timeline and short biographies of scientists and historians who have been influential in developing big history Cynthia Stokes Brown has taught world history in high school and trained high school teachers at Dominican University of California where she piloted big history courses and helped initiate the big history program now required for all freshmen She is the author of the general interest book on big history Big History From the Big Bang to the Present New York New Press 2nd ed 2012 and also wrote a university level textbook with David Christian and Craig Benjamin Big History Between Nothing and Everything New York McGraw Hill 2014 She is a founding member of the International Big History Association and associate editor of its publication Origins **Last of the Giants** Jeff Campbell, 2019-08-01 Today an ancient world is vanishing right before our eyes the age of giant animals Over 40 000 years ago the earth was ruled by megafauna mammoths mastodons saber toothed tigers and giant sloths Of course those creatures no longer exist and there is only one likely reason for that the evolution and arrival of the earth's only tool wielding hunter the wildly adaptive comparatively pint sized human species Many more of the world's biggest and baddest creatures including the black rhino the dodo giant tortoises and the great auk have vanished

since our world became truly global Last of the Giants chronicles those giant animals and apex predators pushed to extinction in the modern era The book also highlights those giant species that remain even though many barely survive living in such low numbers that they are on the brink of leaving this world within the next few decades However there is hope for many endangered species can still be saved As it profiles each extinct and endangered animal Last of the Giants focuses on the conservation efforts that are trying to preserve the world s remaining charismatic species before they are lost forever

Futures of the Study of Culture Doris Bachmann-Medick,Jens Kugele,Ansgar Nünning,2020-08-10 How can we approach possible but unknown futures of the study of culture This volume explores this question in the context of a changing global world The contributions in this volume discuss the necessity of significant shifts in our conceptual and epistemological frameworks Taking into account changing institutional research settings the authors develop pathways to future cultural research addressing the crucial concerns of the cultural and social worlds themselves The contributions thereby utilize contact zones within a wide range of disciplines such as cultural anthropology sociology cultural history literary studies the history of science and bioethics as well as the environmental and medical humanities Examining emerging inter and transdisciplinary points of reference the volume invites scholars in the humanities and social sciences to take part in a conversation about theories methods and practices for the future study of culture

The Fifth Beginning Robert L. Kelly,2019-02-12 I have seen yesterday I know tomorrow This inscription in Tutankhamun s tomb summarizes The Fifth Beginning Here archaeologist Robert L Kelly explains how the study of our cultural past can predict the future of humanity In an eminently readable style Kelly identifies four key pivot points in the six million year history of human development the emergence of technology culture agriculture and the state In each example the author examines the long term processes that resulted in a definitive no turning back change for the organization of society Kelly then looks ahead giving us evidence for what he calls a fifth beginning one that started about AD 1500 Some might call it globalization but the author places it in its larger context a five thousand year arms race capitalism s global reach and the cultural effects of a worldwide communication network Kelly predicts that the emergent phenomena of this fifth beginning will include the end of war as a viable way to resolve disputes the end of capitalism as we know it the widespread shift toward world citizenship and the rise of forms of cooperation that will end the near sacred status of nation states It s the end of life as we have known it However the author is cautiously optimistic he dwells not on the coming chaos but on humanity s great potential

Gene Editing, Law, and the Environment Irus Braverman,2017-07-20 Technologies like CRISPR and gene drives are ushering in a new era of genetic engineering wherein the technical means to modify DNA are cheaper faster more accurate more widely accessible and with more far reaching effects than ever before These cutting edge technologies raise legal ethical cultural and ecological questions that are so broad and consequential for both human and other than human life that they can be difficult to grasp What is clear however is that the power to directly alter not just a singular form of life but also the genetics

of entire species and thus the composition of ecosystems is currently both inadequately regulated and undertheorized In Gene Editing Law and the Environment distinguished scholars from law the life sciences philosophy environmental studies science and technology studies animal health and religious studies examine what is at stake with these new biotechnologies for life and law both human and beyond *Darwin's Walk and The Last Wave* Richard Krooth,2017-08-30 This book describes the reasons humankind may be facing its last moments on Planet Earth Darwin marked the path of species evolution modification and extinction Following Darwin s trajectory of evolution the author reveals how human made technologies have had a devastating impact on Earth s biosphere signaling the continuing disappearance of landscapes and the decline of species life **The Routledge Companion to the Environmental Humanities** Ursula Heise,Jon

Christensen,Michelle Niemann,2017-01-06 The Routledge Companion to the Environmental Humanities provides a comprehensive transnational and interdisciplinary map to the field offering a broad overview of its founding principles while providing insight into exciting new directions for future scholarship Articulating the significance of humanistic perspectives for our collective social engagement with ecological crises the volume explores the potential of the environmental humanities for organizing humanistic research opening up new forms of interdisciplinarity and shaping public debate and policies on environmental issues Sections cover The Anthropocene and the Domestication of Earth Posthumanism and Multispecies Communities Inequality and Environmental Justice Decline and Resilience Environmental Narratives History and Memory Environmental Arts Media and Technologies The State of the Environmental Humanities The first of its kind this companion covers essential issues and themes necessarily crossing disciplines within the humanities and with the social and natural sciences Exploring how the environmental humanities contribute to policy and action concerning some of the key intellectual social and environmental challenges of our times the chapters offer an ideal guide to this rapidly developing field

Environmental Chemistry Stanley E Manahan,2017-02-24 With clear explanations real world examples and updated questions and answers the tenth edition of *Environmental Chemistry* emphasizes the concepts essential to the practice of environmental science technology and chemistry while introducing the newest innovations in the field The author follows the general format and organization popular in preceding editions including an approach based upon the five environmental spheres and the relationship of environmental chemistry to the key concepts of sustainability industrial ecology and green chemistry This readily adaptable text has been revamped to emphasize important topics such as the world water crisis It details global climate change to a greater degree than previous editions underlining the importance of abundant renewable

energy in minimizing human influences on climate Environmental Chemistry is designed for a wide range of graduate and undergraduate courses in environmental chemistry environmental science and sustainability as well as serving as a general reference work for professionals in the environmental sciences and engineering **Wildlife Politics** Bruce

Rocheleau,2017-03-30 An analysis of forces affecting wildlife politics worldwide covering topics such as overexploitation hunting ecotourism and trafficking **Spectrality and Survivance** Marija Grech,2022-05-16 The notion of the

Anthropocene is founded on the premise that traces of human activity on the earth will remain legible in the geological strata for millions of years to come showing evidence of an anthropogenic signature inscribed in the rock by the human species Spectrality and Survivance shows how embedded in this understanding of the Anthropocene is a speculative and specular gesture that transforms the notion of the future into an anthropocentric reflection of the present prohibiting any true engagement with the possibility of a non anthropocentric and post anthropocenic world In this volume Marija Grech develops an alternative conceptual paradigm from which to think the Anthropocene beyond any limited notion of human language human thought human systems of meaning or even a human world Grech considers how the geological trace of the Anthropocene might be said to survive outside of the possibility of any human readership and how the very survival of the human in and beyond the Anthropocene might necessitate such thought Whispers in the Cradle Brittany

Weinberger,2025-01-28 I grew up singing them You did too Cheerful nursery rhymes that seemed so harmless innocent songs passed down through generations filling our childhoods with laughter and melody But what if I told you those playful verses were hiding something much darker Something far more sinister In Whispers in the Cradle I set out to unravel the chilling truths buried beneath these seemingly sweet songs What I discovered was a haunting web of history tales of plague and suffering murder and rebellion betrayal and survival all hidden in plain sight These rhymes meant for children are veiled echoes of humanity s darkest moments How could something as innocent as London Bridge is Falling Down carry the weight of destruction and death Why does Ring Around the Rosie feel eerily like a whispered funeral dirge And who or what really inspired The Muffin Man With each page I peeled back the layers of folklore and unearthed stories of political intrigue forbidden faiths brutal punishment and untold tragedy This isn t just a collection of familiar tunes it s a descent into the shadowy corners of history where nursery rhymes served as coded messages laments and warnings They speak of kings toppled children exploited families torn apart and lives consumed by fire famine and fear These songs were never as innocent as they seemed If you think you know nursery rhymes think again Whispers in the Cradle will shatter everything you thought you understood about the melodies of your childhood Some truths are too dark to stay buried and some whispers too haunting to ignore What secrets have we been singing all along Faith after the Anthropocene Matthew Wickman,Jacob

Sherman,2020-11-09 Recent decades have brought to light the staggering ubiquity of human activity upon Earth and the startling fragility of our planet and its life systems This is so momentous that many scientists and scholars now argue that we

have left the relative climactic stability of the Holocene and have entered a new geological epoch known as the Anthropocene. This emerging epoch may prompt us not only to reconsider our understanding of Earth systems but also to reimagine ourselves and what it means to be human. How does the Earth's precarious state reveal our own? How does this vulnerable condition prompt new ways of thinking and being? The essays that are part of this collection consider how the transformative thinking demanded by our vulnerability inspires us to reconceive our place in the cosmos alongside each other and potentially before God. Who are we after the concept of the Anthropocene? What forms of thought and structures of feeling might attend us in this state? How might we determine our values and to what do we orient our hopes? Faith, a conceptual apparatus for engaging the unseen, helps us weigh the implications of this massive but in some ways mysterious force on the lives we lead; faith helps us visualize what it means to exist in this new and still emergent reality.

The Handy Technology Answer Book Naomi Balaban, James Bobick, 2015-12-21 Technology pervades our daily lives and modern society and not just when it comes to computers and smart phones. Before there was the computer there was the abacus. Before the smart phone there was the telegraph and ball point pen. Electricity, penicillin, and the compass have all led to revolutionary changes in how we live. The Handy Technology Answer Book explains how technology has revolutionized the way people live, work, and play. It covers a broad range of fields including medicine, mining, buildings, transportation, the military, and agriculture, and how they have been changed by technology. From the relationship between science and technology to nanotechnology, robots, and predictions for future technology, The Handy Technology Answer Book presents the latest and historical in an engaging and informative format. It brings well-researched answers to more than 1,100 common questions on technology, such as: What are the major time periods of technology? Who is considered to be the first engineer? Which individual was granted the most U.S. patents? What is a Uniform Resource Locator or URL? What products are made from recycled plastic? Can human beings be cloned? What is the future of wearable technology in health care?
