the streets of Roubaix A People's History of Christianity Denis R Janz,2014-03 These two volumes contain selections and abridgements of the original seven volume edition organized to fit ideally into a course in Christian history On its release the seven volume A people s history of Christianity was lauded for its commitment to raising awareness of the ways in which ordinary Christians have lived throughout more than twenty centuries of Christian History Each volume provides a valuable overview on such topics as birth and death baptism rites food power heresy and more A People's History of Civilization John Zerzan,2018-04-10 The American anarchist primitivist philosopher and author John Zerzan critiques agriculture based civilization as inherently oppressive and advocates drawing upon the life of hunter gatherers as an inspiration for what free society should look like Subjects of his criticism include domestication language symbolic thought and the concept of time This book includes sixteen essays ranging from the beginning of civilization to today s general crisis Zerzan provides a critical perspective about civilization A People s History of Civilization includes chapters about Patriarchy The City and its Inmates War Enters the Picture The Bronze Age The Axial Age The Crisis of Late Antiquity Revolt and Heresy Modernity Takes Charge Who Killed Ned Ludd Cultural Luddism Industrialism and Resistance Decadence WWI Civilization s Pathological Endgame In recent years John Zerzan co editor of Black and Green Review has successfully toured Europe to speak from his primitivist perspective regarding contemporary civilization Zerzan calls Eugene Oregon **Before the Military Revolution** Alexander Querengässer,2021-08-26 Before the Military Revolution examines European Warfare in the Late Middle Ages from 1300 to 1490 It is not restricted only to well covered conflicts like the Anglo Scottish Wars or the Hundred Years War but gives due weight to all regions of Europe including the Empire the Baltic the Balkans and the Mediterranean and considers developments in naval warfare The Hussite Wars and the wars of the Teutonic Order and the Hanseatic League are covered as is the expansion of Moscow the Ottomans and Venice and battles like Aussig 1426 Copenhagen 1428 Chojnice 1454 are discussed alongside Bannockburn and Agincourt This age witnesses fundamental change The feudal system of the High Middle Ages crumbled everywhere in Europe due to climatic change economic crisis and population decline This triggered a fiscalization of the military organization the establishment of taxes and representation of the estates This book argues that these changes are the most fundamental ones in the military and political organization in Europe until the rise of the constitutional state around 1800 and so comes closer to the original concept of a Military Revolution It also takes a critical look at other often discussed developments of this age like the Infantry and Artillery Revolution or the decline of cavalry Combining a chronological and regional narrative with deeper analysis of themes like chivalry strategy economic warfare or military publications makes this book an indispensable read for everyone interested in late medieval history **Theory of Bipolar World** HUANG FENGLIN,2020-07-15 This academic work inheriting and developing the basic principles of Marxism analyzes the world s historical structure by using materialist dialectics and forecasts the direction of the socialist movement and the ways to realize communism It not only makes up for

the horizontal dynamic part of Marxist theory but also points out a logical path for the development of human society Furthermore it predicts the proposal and practice of China s the Belt and Road Initiative from various aspects and provides the theoretical basis and rationale for building a community with a shared future for mankind The theory about the contradictory movement between productive forces and production relations is the crucial part of Marxism and used to guide socialist revolution and construction as well as analyze world history Nevertheless classic writers failed to unveil their relations due to the historical limitations of materialist dialectics and lack of horizontal perspective to investigate the development of nature and human society As a result either productive forces or production relations are regarded as the only deciding factor in Marxist theory and practice and the argument remains This book based on a large number of empirical analyses solved the fundamental problem of historical materialism from the perspective of geographical competition This book holds that after the invention of agriculture in the Neolithic Age species competition was replaced by land based geographic competition which has become the fundamental driving force for the development of human society It not only brought about private ownership and social organizations such as patriarchal clans tribes nationalities classes countries and regions but also made the two poles of the East and the West compete in changing social forms develop productive forces and shape world history after the formation of the Inner Asian nomads This book divides the history of the bipolar competitions between the East and the West after 500 B C into three stages The beginning of the first stage was marked by powerful feudalist China as the power core ending with the rise of capitalist United Kingdom which was the power core of the second stage During this stage with the acquisition of land taxes as its driving force four relatively independent political economic entities were formed from the East to the West with decreasing civilization degree ancient China Inner Asia Islam and Europe referred to as Zone 4 Zone 3 Zone 2 and Zone 1 respectively in this book The second stage with the capitalist UK as the power core ended with the development of socialist China which was the core of power at the third stage The driving force at this stage was the attainment of raw material market Based on the first generation bipolar world pattern two relatively independent political economic entities the capitalist system and the socialist system have been formed from the West to the East This stage was divided into three phases of economic colonization focusing on the realms of public goods natural monopoly and competition This book uses a large amount of historical data to analyze the specific levels of the two stages Despite the fact that factual data support is not sufficient sometimes and some conclusions are open to discussion the theoretical system is complete in line with macro events and the overall framework is convincing By analyzing the first and second stages this book makes a theoretical prediction about the phases and outcomes of the third stage This book holds that the third stage began with the development of socialist China and will end with the realization of world communism and the extinction of geo competitive relations The driving force of this stage is the acquisition of property rights cooperation Based on the second stage bipolar world pattern it will undergo three phases of state owned enterprises cooperation in the realm of

competition natural monopoly and public goods The world from east to west will form an entity with no social difference The author believes that under the background of the advantageous West and disadvantageous East in the economic globalization a structural union based on geo economy is the only option Cross border cooperation of state owned enterprises is the only way to break the natural restriction of private economy win the principal status in the world competition solve the problem of sufficient demand at home and abroad enhance the economic and political situation of the working class in various countries and get rid of the dependence on the capitalist colonial system The property right cooperation of state owned enterprises therefore is the fundamental driving force for the future development of human society This book sums up this historical process of economic cooperation as one driving force the transnational property rights cooperation of state owned enterprises three phases first Zones 4 and 3 then Zones 4 3 and 2 and finally Zones 4 3 2 and 1 and three realms first competition then natural monopoly and finally public goods The book was finalized in early 2013 and the Chinese version was published by the Central Compilation Translation Press in March 2014 In September and October 2013 Chinese President Xi Jinping proposed to the world the initiative to jointly build the Silk Road Economic Belt and the 21st Century Maritime Silk Road The Belt and Road Initiative tracing its history back to the ancient Silk Road aims to jointly build a community of shared interests future and responsibilities through economic cooperation featuring political mutual trust economic integration and cultural tolerance Since it is launched the initiative has received extensive attention and recognition from the international community It has achieved great success in solving China s own economic problems providing sufficient supply to countries along the route enhancing endogenous momentum in undeveloped countries improving people s living standard and promoting the preservation and appreciation of surplus assets worldwide We can see that when carrying out the Belt and Road Initiative the property rights cooperation between state owned enterprises of China and other countries along the line has played a crucial role Countries in Zone 3 such as Russia Inner Asia and Pakistan have taken the lead in making significant progress in cooperation with China in Zone 4 Breakthroughs are achieved in competitive fields such as infrastructure energy manufacturing and trade All these have proved the book s scientific predictions about the third stage This book not only develops Marxist theory but also proves the scientific prophecy by the practice of the Belt and Road Initiative Since the Chinese version was issued it has received wide attention and recognition from all sides When preparing the foreign language version the author has dramatically compressed and modified the Chinese version of the content making the book more complete and more readable

Planning for Protraction Iskander Rehman, 2023-11-09 As Sino US relations have deteriorated concerns have grown in Washington over its ability to defeat China in a major conflict A conflict between such peer competitors would likely become a protracted war of attrition drawing on all dimensions of national power but this reality has yet to receive a sufficient degree of analytical attention In this Adelphi book Iskander Rehman provides a historically informed and empirically grounded study of protracted great power war its core drivers and

characteristics and an examination of the elements that have most often determined a competitor's long term strategic performance. Final victory in a protracted conflict, this book argues, rests on a combination of three core factors: a state's military effectiveness and adaptability, its socio-economic power and resiliency, and the soundness of its alliance management and grand strategy. A detailed analysis of the contemporary Sino-US rivalry assesses how both parties might fare in the event of a protracted war, while highlighting some of its key differentiating aspects, most notably its nuclear and cyber dimensions.
