apparent inconsistencies of various evaluations of force capability within NATO Frequently decision makers are confronted by contradictory results of different studies addressing essentially the same problem leaving them with the impression that the tools of systems analysis and operations research may not be very objective guides However experienced systems researchers know that a detailed comparison of models their assumptions and inputs would generally show that results are not really contradictory But not only seem the decision processes in large national and international organizations to be such that a comparison can hardly ever be accomplished also the documentation available is rarely sufficient to really comprehend the differences in results For these reasons we felt that an effort to review the state of the art of modeling in support of force capability assessments was overdue
