Africa ,2021-05-31 Around the world higher education is faced with a fundamental question what is the basis for our claim of
 societal legitimacy In this book the authors go beyond the classical response regarding teaching research and community
 engagement Instead the editor puts forward the proposition that the answer lies in responsiveness the extent to which
 universities respond or fail to respond to societal challenges Moreover because of its intractable legacy issues and crisis of
 inequality the question regarding the societal legitimacy of universities is particularly clearly manifested in South Africa one
 of the most unequal countries in the world The Responsive University brings together contributions on the issue of
 responsiveness from a number of international university leaders half of them specifically addressing the South African
 situation within the context of the international situation as presented by the other authors In the global discussion about the
 role of universities in society this book provides a conceptual framework for a way forward *South Africa Yearbook* ,2009

Low-Income Students, Human Development and Higher Education in South Africa Melanie Walker,Monica
 McLean,2022-07-15 This book explores learning outcomes for low income rural and township youth at five South African
 universities The book is framed as a contribution to southern and Africa centred scholarship adapting Amartya Sen s
 capability approach and a framework of key concepts capabilities functionings context conversion factors poverty and agency
 to investigate opportunities and obstacles to achieved student outcomes This approach allows a reimagining of inclusive
 learning outcomes to encompass the multi dimensional value of a university education and a plurality of valued cognitive and
 non cognitive outcomes for students from low income backgrounds whose experiences are strongly shaped by hardship
 Based on capability theorising and student voices the book proposes for policy and practice a set of contextual higher
 education capability domains and corresponding functionings orientated to more justice and more equality for each person to
 have the opportunities to be and to do what they have reason to value The book concludes that sufficient material resources
 are necessary to get into university and flourish while there the benefits of a university education should be rich and multi
 dimensional so that they can result in functionings in all areas of life as well as work and future study the inequalities and
 exclusion of the labour market and pathways to further study must be addressed by wider economic and social policies for

inclusive learning outcomes to be meaningful and that universities ought to be doing more to enable black working class students to participate and succeed Low Income Students Human Development and Higher Education in South Africa makes an original contribution to capability scholarship conceptually in theorising a South based multi dimensional student well being higher education matrix and a rich reconceptualisation of learning outcomes as well as empirically by conducting rigorous longitudinal in depth mixed methods research on students lives and experiences in higher education in South Africa The audience for the book includes higher education researchers international capability scholars practitioners and policy makers
