The Human Automobile Humanobile:

The Human Automobile Francis Ogoegbunam Nwankwo, 2014-05-14 An educative informative and entertaining book using the similarities between the automobile and the human to teach valuable and hopefully lasting health education lessons to human beings The audience is anyone with an elementary school education or higher New words have been introduced into the lexicon to stir debate and create awareness of sometimes contradictory human behavior It is hoped that the human love for automobiles will be transferred to love for their bodies because you need a healthy body to effectively drive and control an automobile Biological Abstracts Jacob Richard Schramm, 1963 **B.A.S.I.C.**, 1963 Car Cultures Daniel Miller, 2020-05-26 Anyone who assumes that a car is simply a means to get from point A to point B or who even thinks that they know what a car is should read this book Profoundly shaped by culture the car gives rise to a wide range of emotions from guilt about the environment in the UK to aboriginal concerns with car corpses to struggles to keep the creatures alive with everything but the proper spare parts in West Africa Cars and their landscapes prove central to human life from its most intimate to the widest sense of global crisis and are capable of inspiring epic passions From road rage in Western Europe to the struggles of cab driving in Africa to the emergence of Black identity in the US this book examines the essential humanity of the car which includes the jealousies gender differences fears and moralities that cars give rise to Firmly grounded in detailed ethnographic and historical scholarship this is the first book to provide an informed sense of cars as one of the most familiar and significant forms of material culture Are We There Yet? Dan Albert, 2020-11-17 Tech giants and automakers have been teaching robots to drive Robot controlled cars have already logged millions of miles These technological marvels promise cleaner air smoother traffic and tens of thousands of lives saved But even if robots turn into responsible drivers are we ready to be a nation of passengers In Are We There Yet Dan Albert combines historical scholarship with personal narrative to explore how car culture has suffused America's DNA The plain old fashioned human driven car built our economy won our wars and shaped our democratic creed as it moved us about Driver's ed made teenagers into citizens auto repair made boys into men Crusades against the automobile are nothing new Its arrival sparked battles over street space pitting the masses against the millionaires who terrorized pedestrians When the masses got cars of their own they learned to love driving too During World War II Washington nationalized Detroit and postwar Americans embraced car and country as if they were one Then came 1960s environmentalism and the energy crises of the 1970s Many predicted even welcomed the death of the automobile But many more rose to its defense They embraced trucker culture and took to Citizen Band radios demanding enough gas to keep their big boats afloat Since the 1980s the car culture has triumphed and we now drive more miles than ever before Have we reached the end of the road this time Fewer young people are learning to drive Ride hailing is replacing car buying and with electrification a long and noble tradition of amateur car repair to say nothing of the visceral sound of gasoline exploding inside a big V8 will come to an end When a robot takes over the driver's seat what's to become of

us Are We There Yet carries us from muddy tracks to superhighways from horseless buggies to driverless electric vehicles Like any good road trip it s an adventure so fun you don t even notice how much you ve learned along the way **Vehicles**

David Lipset,Richard Handler,2014-08-01 Metaphor as an act of human fancy combines ideas in improbable ways to sharpen meanings of life and experience Theoretically this arises from an association between a sign for example a cattle car and its referent the Holocaust These sign vehicles serve as modes of semiotic transportation through conceptual space Likewise on the ground vehicles can be rich metaphors for the moral imagination Following on this insight Vehicles presents a collection of ethnographic essays on the metaphoric significance of vehicles in different cultures Analyses include canoes in Papua New Guinea pedestrians and airplanes in North America lowriders among Mexican Americans and cars in contemporary China Japan and Eastern Europe as well as among African Americans in the South Vehicles not only carry people around but also carry how they are understood in relation to the dynamics of culture politics and history *The Psychology of the Car* Stefan Gossling,2017-06-16 The Psychology of the Car explores automotive cultures through the lens of psychology with the goal of achieving a low carbon transport future Worldwide there are now more than one billion cars and their number grows continuously Yet there is growing evidence that humanity needs to reach peak cars as increased air pollution noise accidents and climate change support a decline in car usage While many governments agree the car remains attractive and endeavors to change transport systems have faced fierce resistance Based on insights from a wide range of transport behaviors The Psychology of the Car shows the why of automotive cultures providing new perspectives essential for understanding its attractiveness and for defining a more desirable transport future The Psychology of the Car illustrates the growth of global car use over time and its effect on urban transport systems and the global environment It looks at the adoption of the car into lifestyles the mobilities turn and how the car impacts collective and personal identities The book examines car drivers themselves their personalities preferences and personality disorders relevant to driving The book looks at the role power control dominance speed and gender play as well as the interrelationship between personal freedom and law enforcement The book explores risk taking behaviors as accidental death is a central element of car driving The book addresses how interventions can be successful as well as which interventions are unlikely to work and concludes with how a more sustainable transport future can be created based on emerging transport trends Features deep analyses of individual and collective psychologies of car affection moving beyond sociology based interpretations of automobile culture Illustrates concepts using popular culture examples that expose ideas about automobility Shows how fewer smaller and more environmentally friendly cars as well as low carbon transport modes are more socially attractive *Car* Gregory Votolato,2015-06-15 Whether you drool over their horsepower or decry their emissions the car is an important and ubiquitous part of nearly all of our lives And the history of their design and the innovations of their technologies can tell us a lot about how our values and attitudes have changed In this book Gregory Votolato shows us how and why the automobile

has become since its rise in the late nineteenth century at once an object of unparalleled popular desire and a hugely problematic emblem of the modern world Votolato explores the ways that our love hate relationship with the car has been intimately connected with car design He tells the story of the rise of the private passenger car and all the psychological social and economic functions it has come to serve beyond mere transportation Introducing readers to the automotive design process he traces the lifecycle of the car from the drawing board to the scrapyard offering insights from key figures in the industry as well as a careful evaluation of the car s enormous environmental impact At the same time he looks at the many cultures tied into the automobile from drag racing and customizing to the luxury coachcraft of the classic era Along the way he takes us for a ride in some of the most famous cars ever to have had their tires inflated from the Model T to the Tesla The result is a top down thrilling burn through the history of one of our most beloved and lamented inventions

Driven Alex Davies, 2021-01-05 Alex Davies tells the illuminating and important narrative Steven Levy author of Facebook The Inside Story of the quest to develop driverless cars and the fierce competition between Google Uber and other companies in a race to revolutionize our lives The self driving car has been one of the most vaunted technological breakthroughs of recent years But early promises that these autonomous vehicles would soon be on the roads have proven premature Alex Davies follows the twists and turns of the story from its origins to today The story starts with the Defense Advanced Research Projects Agency DARPA which was charged with developing a land based equivalent to the drone a vehicle that could operate in war zones without risking human lives DARPA issued a series of three Grand Challenges that attracted visionaries many of them students and amateurs who took the technology from Jetsons style fantasy to near reality The young stars of the Challenges soon connected with Silicon Valley giants Google and Uber intent on delivering a new way of driving to the civilian world Soon the automakers joined the quest some on their own others in partnership with the tech titans But as road testing progressed it became clear that the challenges of driving a car without human assistance were more formidable than anticipated Davies profiles the industry s key players from the early enthusiasm of the DARPA days to their growing awareness that while this spin on artificial intelligence isn t yet ready for rush hour traffic driverless cars are poised to remake how the world moves Driven explores the epic tale of competition and comradery long odds and underdogs all in service of a world changing moonshot Andy Greenberg author of Sandworm A New Era of Cyberwar

The Car That Knew Too Much Jean-Francois Bonnefon, 2021-10-12 The inside story of the groundbreaking experiment that captured what people think about the life and death dilemmas posed by driverless cars Human drivers don t find themselves facing such moral dilemmas as should I sacrifice myself by driving off a cliff if that could save the life of a little girl on the road Human brains aren t fast enough to make that kind of calculation the car is over the cliff in a nanosecond A self driving car on the other hand can compute fast enough to make such a decision to do whatever humans have programmed it to do But what should that be This book investigates how people want driverless cars to decide matters of life and death In The Car That

Knew Too Much psychologist Jean Francois Bonnefon reports on a groundbreaking experiment that captured what people think cars should do in situations where not everyone can be saved Sacrifice the passengers for pedestrians Save children rather than adults Kill one person so many can live Bonnefon and his collaborators Iyad Rahwan and Azim Shariff designed the largest experiment in moral psychology ever the Moral Machine an interactive website that has allowed people eventually millions of them from 233 countries and territories to make choices within detailed accident scenarios Bonnefon discusses the responses reporting among other things that babies children and pregnant women were most likely to be saved the media frenzy over news of the experiment and scholarly responses to it Boosters for driverless cars argue that they will be in fewer accidents than human driven cars It s up to humans to decide how many fatal accidents we will allow these cars to have

The Driver in the Driverless Car Vivek Wadhwa,Alex Salkever,2017-04-03 A computer beats the reigning human champion of Go a game harder than chess Another is composing classical music Labs are creating life forms from synthetic DNA A doctor designs an artificial trachea uses a 3D printer to produce it and implants it and saves a child s life Astonishing technological advances like these are arriving in increasing numbers Scholar and entrepreneur Vivek Wadhwa uses this book to alert us to dozens of them and raise important questions about what they may mean for us Breakthroughs such as personalized genomics self driving vehicles drones and artificial intelligence could make our lives healthier safer and easier But the same technologies raise the specter of a frightening alienating future eugenics a jobless economy complete loss of privacy and ever worsening economic inequality As Wadhwa puts it our choices will determine if our future is Star Trek or Mad Max Wadhwa offers us three questions to ask about every emerging technology Does it have the potential to benefit everyone equally What are its risks and rewards And does it promote autonomy or dependence Looking at a broad array of advances in this light he emphasizes that the future is up to us to create that even if our hands are not on the wheel we will decide the driverless car s destination

Autopia Jon Bentley,2019-11-07 Cars are one of the most significant human creations They changed our cities They changed our lives They changed everything But in the next thirty years this technology will itself change enormously If Google get their way are we all going to be ferried around in tiny electric bubble cars Or will we watch robots race a bionic Lewis Hamilton And what about the future of classic cars In Autopia presenter of The Gadget Show and former executive producer of Top Gear Jon Bentley celebrates motoring s rich heritage and meets the engineers and coders who are transforming cars forever From mobile hotel rooms to electric battery technology from hydrogen powered cars to jetpacks Autopia is the essential guide to the future of our greatest invention Fully designed with illustrations and photographs this will be the perfect Christmas gift for car and technology enthusiasts everywhere

Autonorama Peter Norton,2021-10-21 The foundation has been laid for fully autonomous Elon Musk announced in 2016 when he assured the world that Tesla would have a driverless fleet on the road in 2017 It s twice as safe as a human maybe better Promises of technofuturistic driving utopias have been ubiquitous wherever tech companies and carmakers meet In

Autonorama The Illusory Promise of High Tech Driving technology historian Peter Norton argues that driverless cars cannot be the safe sustainable and inclusive mobility solutions that tech companies and automakers are promising us The salesmanship behind the driverless future is distracting us from investing in better ways to get around that we can implement now Unlike autonomous vehicles these alternatives are inexpensive safe sustainable and inclusive Norton takes the reader on an engaging ride from the GM Futurama exhibit to smart highways and vehicles to show how we are once again being sold car dependency in the guise of mobility He argues that we cannot see what tech companies are selling us except in the light of history With driverless cars we re promised that new technology will solve the problems that car dependency gave us zero crashes zero emissions zero congestion But these are the same promises that have kept us on a treadmill of car dependency for 80 years Autonorama is hopeful advocating for wise proven humane mobility that we can invest in now without waiting for technology that is forever just out of reach Before intelligent systems data and technology can serve us Norton suggests we need wisdom Rachel Carson warned us that when we seek technological solutions instead of ecological balance we can make our problems worse With this wisdom Norton contends we can meet our mobility needs with what we have right now

A Brief History of Motion Tom Standage, 2021-08-19 Speckled with anecdotes insights and surprises It is great fun and utterly timely Sunday Times Standage writes with a masterly clarity New York Times The product of deep research great intelligence and burnished prose It is rare that I encounter a non fiction author whose prose is so elegant that it is worth reading for itself Standage is a writer of this class Wall Street Journal Beginning around 3 500 BC with the wheel and moving through the eras of horsepower trains and bicycles Tom Standage puts the rise of the car and the future of urban transport into a broader historical context Our society has been shaped by the car in innumerable ways many of which are so familiar that we no longer notice them Why does red mean stop and green mean go Why do some countries drive on the left and some on the right How did cars introduced only a little over a century ago change the way the world was administered laid out and policed along with experiences like eating and shopping And what might travel in a post car world look like As social transformations from ride sharing to the global pandemic force us to critically re examine our relationship with personal transportation A Brief History of Motion is an essential contribution to our understanding of how the modern world came to be

Car Driven Pasquale De Marco, In the realm of human inventions the automobile stands as a towering titan a symbol of freedom power and progress Yet beneath its gleaming exterior lies a hidden narrative a tale of environmental devastation social division and a profound impact on the human psyche Car Driven delves into the complex relationship between cars and humanity unveiling the intricate tapestry of their interaction Through a blend of personal narratives historical analysis and thought provoking insights this book challenges us to rethink our reliance on automobiles and envision a future where we can coexist with these powerful machines in a more harmonious and sustainable way In the chapters that unfold we explore the many facets of the car s impact on our lives We examine its role in shaping our cities our

economy and our environment We delve into the cultural significance of cars uncovering the ways in which they have been immortalized in literature film and art Ultimately we seek to understand the profound and often contradictory relationship between humans and cars With eloquence and erudition Car Driven weaves together a compelling narrative that exposes the hidden costs of our car centric society It challenges us to confront the environmental degradation social inequality and psychological toll that our reliance on automobiles has wrought Yet it also offers a glimmer of hope pointing towards a future where we can harness the transformative power of cars for the betterment of humanity and the planet This book is an essential read for anyone interested in the history culture and impact of automobiles It is a clarion call for a more sustainable and equitable relationship between humans and cars a future where we can harness the power of these machines without compromising our planet or our humanity If you like this book write a review Driverless Hod Lipson, Melba Kurman, 2016
