Weed Caitlin Donohue,2023-09-05

Humans have used cannabis for thousands of years since Neolithic peoples sought out its medicinal benefits. But for the past century its use has been largely criminalized. Stigma around cannabis has made it difficult for people of all ages to get straightforward answers about how to minimize health risks related to cannabis consumption or to understand how the plant has shaped and continues to shape society today.

In *Weed: Cannabis Culture in the Americas*, culture writer Caitlin Donohue crafts a comprehensive and thought provoking review of cannabis in the Western Hemisphere. Donohue's investigation spans from Vancouver, Canada to Buenos Aires, Argentina, interviewing medical researchers, educators, activists, artists, business leaders and other experts to explore the long relationship between cannabis and the human race, its almost universal prohibition in the twentieth century and modern efforts to legalize the much maligned plant in all its forms.

Sustainable Materials for the Built Environment Dorian A. Hanaor, 2025-12-02. A liveable built environment along with stable access to food and water is one of the cornerstones of societal well-being worldwide. This book brings together a global cross-section of researchers and engineers from a range of disciplines and presents their insights into materials and processing technologies that can help pave the way for the sustainable built environments of our future. Featuring cutting-edge approaches from reimagining material supply chains to harnessing 3D printing for eco-friendly materials, this book explores the art of cob building, looks at the potential of bio-based materials and explains circular economy principles in construction. Readers will discover novel uses of agricultural by-products, delve into hemp-based solutions and gain an understanding of the chemistry behind eco-conscious concretes. Within these pages lies an unveiling of pathways to waste reduction, resource optimization and seamless integration of nature into construction. With insights encompassing timber, cement, masonry and more, this book stands as an indispensable resource for professionals and enthusiasts actively shaping a greener built environment while drawing upon a mix of contemporary scientific advancements and ancestral wisdom.

The Hemp Manifesto Rowan Robinson, 1997-07-01. A pocket-sized book that serves as a reminder of the many surprising facts about the medicinal and environmental value of cannabis sativa. The hemp revolution is happening despite the efforts of politicians and law enforcement agencies to stop it. Medical marijuana initiatives on the ballots in California and Arizona passed with overwhelming support. All around the globe, this miracle plant is creating industries for food, fuel, clothing, housing and paper that are beneficial to both humanity and the environment. Designed to fit into the back pocket of your hemp jeans, *The Hemp Manifesto* offers 101 ways that hemp is making a positive impact on society and explains why in brief summaries simple enough for even congressional representatives to understand. Included are all the most surprising facts about the plant: how the Declaration of Independence was written on hemp paper; how the U.S. government grows marijuana and supplies it to eight people free of charge; how hemp seeds are the most complete source of protein and essential fatty acids known in the vegetable kingdom; and many more. *The Hemp Manifesto* gives the people their most important weapon in the fight for a

healthy future the truth Small and affordable a perfect small gift Wars of disinformation are still being waged against this useful plant and its industries and the real facts can be difficult to find The Hemp Manifesto prints the simple truth

The environmental impacts of construction are momentous How can architects minimise these by making responsible material choices Material choices have a global impact The design and construction industry are responsible for 39% of all carbon emissions in the world Despite the great desire among architects to address this it can be difficult to compare materials directly let alone understand the repercussions of selecting materials for use in different parts of a building or of sourcing them from across the world Showcasing the latest thought leadership from subject experts across the industry this primer sets out the various

considerations and parameters for specifying a particular material. It empowers architects with the knowledge of which materials are available, how best to use them, and what their future holds as the industry continues to innovate. Each chapter will be devoted to a single material and will consider environmental impacts holistically, looking at health and biodiversity impacts among other issues. Featuring chapters written by subject experts including Duncan Baker Brown, Carol Costello, Graham Coult, Barbara Jones, Rowland Keable, Bruce Martin, Michael Stacey, and Oliver Wilton. Mainstream and burgeoning materials including aluminium, bamboo, brick, concrete, cork, hemp, mycelium, plastics, steel, stone, and timber. Diagrams, graphics, and illustrated exemplars.

A History of the Hemp Industry in Kentucky James F. Hopkins, 2021-10-21. It is hard to believe that at one time burley tobacco was not the chief cash crop in Kentucky. Yet for more than half a century, hemp dominated the state's agricultural production. James Hopkins surveys the hemp industry in Kentucky from its beginning through its complete demise at the end of World War II, describing the processes of seeding and harvesting the plant and marketing manufactured goods made of the fiber. With debate presently raging over the legalization of industrial hemp, it is essential that an accurate portrait of this controversial resource be available. Although originally published in 1951, Hopkins's work remains remarkably current as hemp manufacturing today is little changed from the practices the author describes. This edition includes an updated bibliography of recent publications concerning the scientific, economic, and political facets of industrial hemp.

The Eco-Home Design Guide Christopher Day, 2015-10-29. The key principles of designing a pleasant, comfortable, and healthy eco-home, with a foreword written by HRH The Prince of Wales, now King Charles III. Designing an eco-home is much more about working with your house's location and situation than relying on intrusive technology and hi-tech materials. With the soaring energy bills and the climate crisis, it is now more important than ever to invest in a home that is considerate of keeping heat in. In this handbook, architect Christopher Day draws on his extensive experience to explain the key principles of eco-home design using common-sense methods. Packed full of practical information, it includes several case studies of eco-homes, reviewing with hindsight what worked well and what could have been better. There is also guidance on how to generate energy, upgrading old buildings, and site planning. With beautifully hand-drawn illustrations, Christopher explores how to use local topography combined with landscaping to improve your home's microclimate and keep your house dry and warm in the winter and cool in the summer. There are also handy tips on how to minimise hidden environmental impacts and ideas on ways to make your home a safe and healthy place, both emotionally and physically. *The Eco Home Design Guide* is essential for anyone who wants to create an attractive, environmentally friendly home that is in harmony with its location.
