The Importance Of Teaching Sequence

Lior Shmuelof, John W Krakauer

The Importance Of Teaching Sequence:

Sequence Learning Ron Sun, C. Lee Giles, 2003-06-29 Sequential behavior is essential to intelligence in general and a fundamental part of human activities ranging from reasoning to language and from everyday skills to complex problem solving. Sequence learning is an important component of learning in many tasks and application fields: planning, reasoning, robotics, natural language processing, speech recognition, adaptive control, time series prediction, financial engineering, DNA sequencing, and so on. This book presents coherently integrated chapters by leading authorities and assesses the state of the art in sequence learning by introducing essential models and algorithms and by examining a variety of applications. The book offers topical sections on sequence clustering and learning with Markov models, sequence prediction and recognition with neural networks, sequence discovery with symbolic methods, sequential decision making, biologically inspired sequence learning models.

Iterative Design of Teaching-Learning Sequences Dimitris Psillos, Petros Kariotoglou, 2015-11-24 This book addresses a very important aspect of science education and science education research respectively: the research-based development of Teaching-Learning Sequences. The authors elaborate on important theoretical issues as well as aspects of the design and iterative evolution of a several Teaching-Learning Sequences in a modern scientific and technological field which is socially relevant and educationally significant. The book is divided into two parts. The first part includes a collection of papers discussing the theoretical foundations and characteristics of selected theoretical frameworks related to designing Teaching-Learning Sequences; the second part elaborates on common issues and draws on the wider perspective of design research in education. The second part contains a collection of papers presenting case studies concerning the design, implementation, iterative evolution, and evaluation of Teaching and Learning Sequences in a variety of educational contexts. The case studies deal with a more or less new subject matter, a part of modern interdisciplinary science, material science, which enhances the connections between science and technology. From a wider perspective, the case studies draw on existing theoretical ideas on inquiry in various contexts and provide powerful suggestions for contextualized innovation in a variety of school systems and existing practices.

Research and the Quality of Science Education Kerst Boersma, Martin Goedhart, Onno de Jong, Harrie Eijkelhof, 2006-02-23 In August 2003 over 400 researchers in the field of science education from all over the world met at the 4th ESERA conference in Noordwijkerhout, The Netherlands. During the conference 300 papers about actual issues in the field, such as the learning of scientific concepts and skills, scientific literacy, informal science learning, science teacher education, modeling in science education, were presented. The book contains 40 of the most outstanding papers presented during the conference. These papers reflect the quality and variety of the conference and represent the state of the art in the field of research in science education.

Mathematical Competencies in the Digital Era Uffe Thomas Jankvist, Eirini Geraniou, 2023-02-20 This book focuses on the potential interplay between two distinct yet related paradigm shifts in mathematics education drawing on the notion of networking of theories through illustrative case studies from the Danish educational system and beyond The first paradigm shift is the massive introduction of digital technology in the teaching and learning of the subject the second is a shift from the traditional focusing on mastering of skills and knowledge to being concerned with the possession and development of mathematical competencies This book builds on the Danish KOM Competencies and the Learning of Mathematics project which sources its description of mathematical mastery primarily on the notion of a mathematical competency rather than on lists of topics concepts and results This allows for an overarching framework which captures the perspectives of mathematics teaching and learning at whichever educational level While the KOM framework does not in detail address the role of digital technologies in relation to its description of different types of

mathematical competencies etc the chapters of this book set out to do exactly this while in the process also drawing on a selection of other theoretical constructs and frameworks from mathematics education research Starting with introductory chapters by key researchers in the area the book brings forth chapters for each of the KOM framework s eight mathematical competencies authored by Nordic researchers in combination with international scholars The KOM framework also operates with three types of overview and judgement which are specifically addressed in relation to the role of digital technologies in the third part of the book The fourth and final part of the book broadens the scene and provides chapters of a more perspective nature in relation to mathematical competencies in the digital era The book s preface is by Susanne Prediger

Lectures on Teaching, Delivered in the University of Cambridge During the Lent Term, 1880 Sir Joshua Girling Fitch,1889 Recent insights into perceptual and motor skill learning (The computational and neural processes underlying perceptual and motor skill learning) Lior Shmuelof,John W Krakauer,2015-03-18 Improvements in task performance following practice can occur as a result of changes in distinct cognitive and neural processes In some cases we can improve our performance by selecting a more successful behavior that is already part of our available repertoire Skill learning on the other hand refers to a slower process that results in improving the ability to perform a behavior i e it involves the acquisition of a behavior that was not available to the controller before training Skill learning can take place both in the sensory and in the motor domains Sensory skill acquisition in perceptual learning tasks is measured by improvements in sensory acuity through practice induced changes in the sensitivity of relevant neural networks Motor skill is harder to define as the term is used whenever a motor learning behavior improves along some dimension Nevertheless we have recently argued that as in perceptual learning acuity is an integral component in motor skill learning In this special topic we set out to integrate experimental and theoretical work on perceptual and motor skill learning and to stimulate a discussion regarding the similarities and differences between these two kinds of learning **The Interplay Between Sleep and Emotion: What Role Do Cognitive Processes Play?** Caterina Lombardo,Nicola Cellini,2021-01-14 **Teaching Primary Science Constructively** Keith Skamp,Christine Preston,2017-09-05 Teaching Primary Science Constructively helps readers to create effective science learning experiences for primary students by using a constructivist approach to learning This best selling text explains the principles of constructivism and their implications for learning and teaching and discusses core strategies for developing science understanding and science inquiry processes and skills Chapters also provide research based ideas for implementing a constructivist approach within a number of content strands Throughout there are strong links to the key ideas themes and terminology of the revised Australian Curriculum Science This sixth edition includes a new introductory chapter addressing readers preconceptions and concerns about teaching primary science *Functional Movement Development Across the Life Span - E-Book* Donna Joy Cech,Suzanne Tink Martin,2023-11-20 Providing a solid foundation in the normal development of functional movement Functional Movement Development Across the Life Span 4th Edition helps
