The Anthropocene Cookbook Zane Cerpina, Stahl Stenslie, 2022-10-18 More than sixty speculative art and design projects explore how art food and creative thinking can prepare us for future catastrophes In the Age of the Anthropocene an era characterized by human caused climate disaster catastrophes and dystopias loom The Anthropocene Cookbook takes our planetary state of emergency as an opportunity to seize the moment to imagine constructive change and new ideas How can we survive in an age of constant environmental crises How can we thrive The Anthropocene Cookbook answers these questions by presenting a series of investigative art and design projects that explore how art food and creative thinking can prepare us for future catastrophes This cookbook of ideas rethinks our eating habits and traditions challenges our food taboos and proposes new recipes for humanity's survival These more than sixty projects propose new ways to think and make food offering tools for creative action rather than traditional recipes They imagine modifying the human body to digest cellulose turning plastic into food tasting smog extracting spices and medicines from sewage and growing meat in the lab They investigate provocative possibilities What if we made cheese using human bacteria enabled human photosynthesis through symbiosis with algae and brought back extinct species in order to eat them The projects are diverse in their creative approaches and their agendas multilayered multifaceted hybrid and cross pollinated The Anthropocene Cookbook offers a survival guide for a future gone rogue a road map to our edible futures

Bioart Kitchen Lindsay Kelley, 2016-03-07 What do new technologies taste like A growing number of contemporary artists are working with food live materials and scientific processes in order to explore and challenge the ways in which manipulation of biological materials informs our cooking and eating Bioart or biological art uses biotech methods to manipulate living systems from tissues to ecologies While most critiques of bioart emphasise the influences of new media digital media and genetics this book takes a bold alternative approach Bioart Kitchen explores a wide spectrum of seemingly unconnected subjects which when brought together offer a more inclusive expansive history of bioart namely home economics the feminist art of the 1970s tissue culture methodologies domestic computing and contemporary artistic engagements with biotechnology

Clean Meat Paul Shapiro, 2024-04-09 In this important book that could just save your life Michael Greger MD bestselling author of *How Not to Die* Paul Shapiro gives you a front row seat for the wild story of the race to create and commercialize cleaner safer sustainable meat real meat without the animals From the entrepreneurial visionaries to the scientists workshops to the big business board rooms he details that quest for clean meat and that's poised to revolutionize the business of food and agriculture Jack Welch former CEO of General Electric Since the dawn of Homo sapiens some quarter million years ago animals have satiated our species desire for meat But with a growing global population and demand for meat eggs dairy leather and more raising such massive numbers of farm animals is

woefully inefficient and takes an enormous toll on the planet public health and certainly the animals themselves But what if we could have our meat and eat it too The next great scientific revolution is underway discovering new ways to create enough food for the world's ever growing ever hungry population Enter cellular agriculture real actual meat grown from animal cells as well as other clean foods that ditch animal cells altogether and are simply built from the molecule up Whereas our ancestors domesticated wild animals into livestock today we're beginning to domesticate their cells leaving the animals out of the equation This is a fascinating look at the future of food and the innovators who are working to interrupt and reinvent the food system Ann Veneman former executive director of UNICEF and former US Secretary of Agriculture

The Plant-based and Vegan Handbook Yanoula Athanassakis, Renan Larue, William O'Donohue, 2024-09-17 The Plant based and Vegan Handbook is the first of its kind to bring together interlocking and sometimes conflicting perspectives focused on veganism and plant based living As an interdisciplinary volume the noted contributors are from the fields of medicine psychiatry environmental studies sociology marine ecology philosophy agriculture psychology animal studies religion economics literature business and law Despite a range of individual preferences these authors advance a scientific argument for a societal move away from the current model of human and nonhuman animal relationships In our Anthropocene era experts not only debate about how human beings will survive on Earth but more particularly are more concerned with how they will thrive As evidenced by the authors in this collection it will involve a reconsideration of the way our species relates to the planet and to other species This volume can serve as a critical reference work especially for students and scholars working in both emerging and established fields such as psychology medicine animal studies food studies environmental studies philosophy animal ethics and marine ecology

The Routledge Handbook of Animal Ethics Bob Fischer, 2019-12-06 There isn't one conversation about animal ethics Instead there are several important ones that are scattered across many disciplines This volume both surveys the field of animal ethics and draws professional philosophers graduate students and undergraduates more deeply into the discussions that are happening outside of philosophy departments To that end the volume contains more nonphilosophers than philosophers explicitly inviting scholars from other fields such as animal science ecology economics psychology law environmental science and applied biology among others to bring their own disciplinary resources to bear on matters that affect animals The Routledge Handbook of Animal Ethics is composed of 44 chapters all appearing in print here for the first time and organized into the following six sections I Thinking About Animals II Animal Agriculture and Hunting III Animal Research and Genetic Engineering IV Companion Animals V Wild Animals Conservation Management and Ethics VI Animal Activism The chapters are brief and they have been written in a way that is accessible to serious undergraduate students regardless of their field of study The volume covers everything from animal cognition to the state of current fisheries from genetic modification to intersection animal activism It is a resource designed for anyone interested in the moral issues that emerge from human interactions with animals

Food, Politics, and Society Alejandro

Colas,2018-10-16 Food and drink has been a focal point of modern social theory since the inception of agrarian capitalism and the industrial revolution From Adam Smith to Mary Douglas major thinkers have used key concepts such as identity exchange culture and class to explain the modern food system Food Politics and Society offers a historical and sociological survey of how these various ideas and the practices that accompany them have shaped our understanding and organization of the production processing preparation serving and consumption of food and drink in modern societies Divided into twelve chapters and drawing on a wide range of historical and empirical illustrations this book provides a concise informed and accessible survey of the interaction between social theory and food and drink It is perfect for courses in a wide range of disciplines *The Art of Ethics in the Information Society* Liisa Albertha Wilhelmina Janssens,2025-10-01 New technologies

are often implemented before their ethical consequences have been fully understood In this volume experts working in the sciences arts and philosophy of technology share novel perspectives on how we can best identify and navigate the new ethical crossroads emerging in our information society With an eye toward the future the contributors present an essential and unique view on the interplay between ethics and modern technology **Billion Dollar Burger** Chase Purdy,2024-05-14

The riveting story of the entrepreneurs and renegades fighting to bring lab grown meat to the world The trillion dollar meat industry is one of our greatest environmental hazards it pollutes more than all the world s fossil fuel powered cars Global animal agriculture is responsible for deforestation soil erosion and more emissions than air travel paper mills and coal mining combined It also of course depends on the slaughter of more than 60 billion animals per year a number that is only increasing as the global appetite for meat swells But a band of doctors scientists activists and entrepreneurs have been racing to end animal agriculture as we know it hoping to fulfill a dream of creating meat without ever having to kill an animal In the laboratories of Silicon Valley companies Dutch universities and Israeli startups visionaries are growing burgers and steaks from microscopic animal cells and inventing systems to do so at scale allowing us to feed the world without slaughter and environmental devastation Drawing from exclusive and unprecedented access to the main players from polarizing activist turned tech CEO Josh Tetrick to lobbyists and regulators on both sides of the issue Billion Dollar Burger follows the people fighting to upend our food system as they butt up against the entrenched interests fighting viciously to stop them The stakes are monumentally high cell cultured meat is the best hope for sustainable food production a key to fighting climate change a gold mine for the companies that make it happen and an existential threat for the farmers and meatpackers that make our meat today Are we ready **Engaging Affects, Thinking Feelings** Susan Driver,Melanie Patenaude,Kara

Stone,2016-06-22 The thought provoking essays brought together in Engaging Affects Thinking Feelings Social Political and Artistic Practices balance critical thinking with creative opportunities to imagine new possibilities With an international breadth that crosses continents and an interdisciplinary orientation that connects diverse scholarly fields this collection is ambitious in its scope At the same time the essays focus on the small details embodied traces and intimate spaces of

experience often overlooked or devalued within dominant discourses Exploring diverse issues and methodologies the contributions here share a willingness to pay close attention to vulnerable subjects that challenge readers to think beyond the rational and binary limits of academic knowledge As such the authors simultaneously engage readers intellects and emotions as they write passionately about subjects ranging from war food sexuality geography social media poetry photography and philosophy The result is a text that offers diverse ways of mobilizing an array of affect theories in relation to specific sites of interpretation activism and creativity

Meathooked Marta Zaraska, 2016-02-23 Explores the world's meat cultures and traditions to share insights into why a craving for animal protein evolved in humans and why vegetarian lifestyles are so difficult to maintain despite health warnings

From Assessing to Conserving Biodiversity Elena Casetta, Jorge Marques da Silva, Davide Vecchi, 2019-06-17 This open access book features essays written by philosophers biologists ecologists and conservation scientists facing the current biodiversity crisis Despite increasing communication accelerating policy and management responses and notwithstanding improving ecosystem assessment and endangered species knowledge conserving biodiversity continues to be more a concern than an accomplished task Why is it so The overexploitation of natural resources by our species is a frequently recognised factor while the short term economic interests of governments and stakeholders typically clash with the burdens that implementing conservation actions imply But this is not the whole story This book develops a different perspective on the problem by exploring the conceptual challenges and practical defiance posed by conserving biodiversity namely on the one hand the difficulties in defining what biodiversity is and characterizing that thing to which the word biodiversity refers to on the other hand the reasons why assessing biodiversity and putting in place effective conservation actions is arduous

Cultivated Meat to Secure Our Future Michel Vandenbosch, Philip Lymbery, 2023-10-24 This provocative book informs inspires and opens debates about cultivated meat through an amazing collection of visionary and respected contributors Each essay in this collection powerfully presents the latest research and opinions regarding its potential for solving our current planetary crises Contributors include Isha Datar of New Harvest Chase Purdy author of Billion Dollar Burger and Hanna Tuomisto one of the world's leading researchers in the field of environmental sustainability assessment of cell cultured food production technologies Also included is a thought provoking foreword by Ira van Eelen daughter of Willem van Eelen the godfather of cultivated meat and CEO of KindEarth Tech and RESPECTfarms

The End of Animal Farming Jacy Reese, 2018-11-06 A bold yet realistic vision of how technology and social change are creating a food system in which we no longer use animals to produce meat dairy or eggs Michael Pollan's *The Omnivore's Dilemma* and Jonathan Safran Foer's *Eating Animals* brought widespread attention to the disturbing realities of factory farming *The End of Animal Farming* pushes this conversation forward by outlining a strategic roadmap to a humane ethical and efficient food system in which slaughterhouses are obsolete where the tastes of even the most die hard meat eater are satisfied by innovative food technologies like cultured

meats and plant based protein Social scientist and animal advocate Jacy Reese analyzes the social forces leading us toward the downfall of animal agriculture the technology making this change possible for the meat hungry public and the activism driving consumer demand for plant based and cultured foods Reese contextualizes the issue of factory farming the inhumane system of industrial farming that 95 percent of farmed animals endure as part of humanity's expanding moral circle Humanity increasingly treats nonhuman animals from household pets to orca whales with respect and kindness and Reese argues that farmed animals are the next step Reese applies an analytical lens of effective altruism the burgeoning philosophy of using evidence based research to maximize one's positive impact in the world in order to better understand which strategies can help expand the moral circle now and in the future *The End of Animal Farming* is not a scolding treatise or a prescription for an ascetic diet Reese invites readers vegan and non vegan to consider one of the most important and transformational social movements of the coming decades

Sustainable Food Futures Jessica Duncan, Megan Bailey, 2017-08-04 Securing sustainable food for everyone is one of the world's most pressing challenges but research policy and programmes remain fragmented and effective solutions have been slow to emerge This book takes on these challenges by proposing a range of solutions that can advance pathways towards sustainable food futures Complete with recipes this book is structured so that readers are taken in a logical progression through discussions of solutions highlighting the need to recognise the importance of place and the importance of participation and to challenge dominant descriptions of markets through to re designing food systems The solutions presented in this book are based on real world cases but discussions remain deliberately broad to encourage thinking in new ways Cases are drawn from Africa Asia Europe and North and South America The book is of relevance to those interested in sustainable food futures and can serve as a supplementary textbook for a wide range of courses in food studies and related disciplines

Future Foods David Julian McClements, 2019-04-29 We are in the midst of an unprecedented era of rapid scientific and technological advances that are transforming the way our foods are produced and consumed Food architecture is being used to construct healthier tastier and more sustainable foods Functional foods are being created to combat chronic diseases such as obesity cancer diabetes stroke and heart disease These foods are fortified with nutraceuticals or probiotics to improve our mood performance and health The behavior of foods inside our guts is being controlled to increase their healthiness Precision nutrition is being used to tailor diets to our unique genetic profiles microbiomes and metabolisms Gene editing nanotechnology and artificial intelligence are being used to address modern food challenges such as feeding the growing global population reducing greenhouse gas emissions reducing waste and improving sustainability However the application of these technologies is facing a backlash from consumers concerned about the potential risks posed to human and environmental health Some of the questions addressed in this book are What is food architecture How does sound and color impact taste Will we all have 3D food printers in all our homes Should nanotechnology and gene editing be used to enhance our foods Are these new technologies safe Would you eat bug

foods if it led to a more sustainable food supply Should vegetarians eat themselves Can nutraceuticals and probiotics stop cancer What is the molecular basis of a tasty sustainable burger David Julian McClements is a Distinguished Professor in food science who has used physics chemistry and biology to improve the quality safety and healthiness of foods for over 30 years He has published over 900 scientific articles and 10 books in this area and is currently the most highly cited food scientist in the world He has won numerous scientific awards for his work The aim of this book is to highlight the many exciting advances being made in the science of foods and to show their application for solving important problems related to the modern food supply such as tackling chronic diseases feeding a global population reducing food waste and creating healthier and tastier foods
