T. (Alfred Thayer) Mahan, 2018-08-14 The Influence of Sea Power Upon History 1660 1783 by A T Alfred Thayer Mahan The history of Sea Power is largely though by no means solely a narrative of contests between

nations of mutual rivalries of violence frequently culminating in war The profound influence of sea commerce upon the wealth and strength of countries was clearly seen long before the true principles which governed its growth and prosperity were detected To secure to one's own people a disproportionate share of such benefits every effort was made to exclude others either by the peaceful legislative methods of monopoly or prohibitory regulations or when these failed by direct violence The clash of interests the angry feelings roused by conflicting attempts thus to appropriate the larger share if not the whole of the advantages of commerce and of distant unsettled commercial regions led to wars On the other hand wars arising from other causes have been greatly modified in their conduct and issue by the control of the sea Therefore the history of sea power while embracing in its broad sweep all that tends to make a people great upon the sea or by the sea is largely a military history and it is in this aspect that it will be mainly though not exclusively regarded in the following pages A study of the military history of the past such as this is enjoined by great military leaders as essential to correct ideas and to the skilful conduct of war in the future Napoleon names among the campaigns to be studied by the aspiring soldier those of Alexander Hannibal and Caesar to whom gunpowder was unknown and there is a substantial agreement among professional writers that while many of the conditions of war vary from age to age with the progress of weapons there are certain teachings in the school of history which remain constant and being therefore of universal application can be elevated to the rank of general principles For the same reason the study of the sea history of the past will be found instructive by its illustration of the general principles of maritime war notwithstanding the great changes that have been brought about in naval weapons by the scientific advances of the past half century and by the introduction of steam as the motive power We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience

The Influence of Sea Power Upon History, 1660-1783. by A. T. Mahan, 2016-06-17

The Influence of Sea Power Upon History 1660-1783 is a history of naval warfare published in 1890 by Alfred Thayer Mahan It details the role of sea power during the seventeenth and eighteenth centuries and discusses the various factors needed to support and achieve sea power with emphasis on having the largest and most powerful fleet Scholars consider it the single most influential book in naval strategy Its policies were quickly adopted by most major navies ultimately leading to the World War I naval arms race Mahan formulated his concept of sea power while reading a history book in Lima Peru The book was published by Mahan while president of the US Naval War College and was a culmination of his ideas regarding naval warfare Mahan began the book with an examination of what factors lead to a supremacy of the seas especially how Great Britain was able to rise to its near dominance He identifies such features as geography population and government and expands the definition of sea power as comprising a strong navy and commercial fleet Mahan also promotes the belief that any army would succumb to a strong naval blockade The book then goes on to describe a series of European and American wars and how naval power was used in Timeliness contributed no small part to the widespread acceptance and resultant influence of Mahan's views Although his history was relatively thin he relied on secondary sources the vigorous style and clear theory won widespread acceptance of navalists across the world

8 Sea power supported the new colonialism which Europe and Japan were imposing on Africa and Asia Given the very rapid technological changes underway in propulsion from coal to oil from reciprocating engines to steam turbines ordnance with better fire directors and new high explosives and armor hardened steel the emergence of new craft such as destroyers and submarines and the development of radio Mahan's emphasis on the capital ship and the command of the sea came at an opportune moment Mahan was initially introduced to the German navy by the strategist Ludwig Borckenhagen in a series of influential papers Subsequently his name became a household word in the German navy as Kaiser Wilhelm II ordered his officers to read Mahan and Admiral Alfred von Tirpitz 1849-1930 used Mahan's reputation to finance a powerful surface fleet His ideas decisively shaped Japanese naval doctrine

especially in the fleet actions of World War I Between 1890 and 1915 Mahan and British admiral Jackie Fisher 1841 1920 faced the problem of how to dominate home waters and distant seas with naval forces not strong enough to do both Mahan argued for a universal principle of concentration of powerful ships in home waters and minimized strength in distant seas while Fisher reversed Mahan by utilizing technological change to propose submarines for defense of home waters and mobile battle cruisers for protection of distant imperial interests The French at first adopted Mahan's theories French naval doctrine in 1914 was dominated by Mahan's theory of sea power and therefore geared toward winning decisive battles and gaining mastery of the seas But the course of World War I changed ideas about the place of the navy as the refusal of the German fleet to engage in a decisive battle the Dardanelles expedition of 1915 the development of submarine warfare and the organization of convoys all showed the navy's new role in combined operations with the army
