Cumulated Index Medicus ,1997 *Female Police Officers in Pakistan* Sadaf Ahmad, 2025-10-02 Pakistan's police have historically displayed significant apathy towards recruiting women considering them unsuitable for this profession The social stigma of working in a notorious male dominated organization has also prevented many women from joining in the past Today female police officers comprise just over 3% of the Pakistani police This book is the first to examine their experiences within it It draws on extensive ethnographic research on female police officers of all ranks in cities across Pakistan to illustrate the diversity of their recruitment roles experiences and career prospects across rank cadre and region It also demonstrates how female officers are combatting patriarchal challenges to make greater inroads into a masculine terrain taking on diverse roles and playing an increasingly important role in supporting women's access to justice and why these changes cannot be conflated with the idea that these will automatically and radically transform the organization itself
