1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

1. The working distance will depend on several factors:
 - a. the amount of light
 - b. the magnification of the objective
 - c. the refractive index of the specimen
 - d. the refractive index of the immersion oil
2. The working distance is the distance between the objective and the specimen.
3. The working distance is the distance between the objective and the specimen.
4. The working distance is the distance between the objective and the specimen.
5. The working distance is the distance between the objective and the specimen.
6. The working distance is the distance between the objective and the specimen.
7. The working distance is the distance between the objective and the specimen.
8. The working distance is the distance between the objective and the specimen.
9. The working distance is the distance between the objective and the specimen.
10. The working distance is the distance between the objective and the specimen.
