The Statesman's Yearbook 2016 Nick Heath-Brown, 2017-02-07 Now in its 152nd edition *The Statesman's Yearbook* continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions www.statesmansyearbook.com *Papers*, 1924 *Oceanic Strategy* Vidhan Pathak, Raghvendra Kumar, 2024-12-03 This book introduces the concept of oceanic strategy expanding beyond traditional maritime and naval perspectives to include political economic socio cultural and ecological dimensions It highlights the Indian Ocean Region as a critical arena for global power competition where the abundance of resources strategic significance and emerging interests have made it a new frontier for opportunity growth and conflict By incorporating aspects like oceanic security resource exploration the blue economy and hydrography the book presents a broader view of strategic thought and the role of oceanic spaces in national and global geopolitics Focusing on key players such as India China the US and other traditional and emerging powers the book analyses the reorientation of national interests and the intensifying struggle for dominance in the Indian Ocean It argues that control over this region is crucial for attaining influence in 21st century geopolitics The work also addresses non traditional security threats like piracy and transnational crime situating the Indian Ocean at the heart of modern geopolitical discourse This book is an essential resource for students and scholars of international relations strategic studies and political science offering critical insights into the evolving power dynamics shaping the future of the Indian Ocean Region *The Blue Economy in Sub-Saharan Africa* DONALD SPARKS, 2021-06-16 The blue economy comprising coastal and marine resources offers vast benefits for sub Saharan Africa of the 53 countries and territories in the region 32 are coastal states there are 13 million sq km of maritime zones more than 90% of the region's exports and imports come by sea and the African Union hails the blue economy as the new frontier of African renaissance Despite their importance the region's coastal and marine resources have been neither fully appreciated nor fully utilized They are only now being recognized as being key to Africa's potential prosperity As the region grows it has in general not taken adequate safeguards to protect these valuable resources That is partly because some of the problems pollution for example are regional and know no borders All too often short term gains are made at the expense of the long term overfishing for example This book provides for the first time a study of the constraints and opportunities the blue economy offers for sub Saharan Africa It includes an introduction and overview sectoral analyses including tourism fisheries mineral resources culture shipping and maritime safety country case studies and analyses of regional and international efforts towards better coastal zone and marine management *The Eastern Fleet and the Indian Ocean, 1942-1944* Charles Stephenson, 2022-04-06 A study of the British Royal Navy's activities in the Indian Ocean during World War II led by Admiral Sir James Somerville The story of the British Eastern Fleet which operated in the Indian Ocean against Japan has rarely been told Although it was the largest fleet deployed by the Royal Navy prior to 1945

and played a vital part in the theatre it was sent to protect it has no place in the popular consciousness of the naval history of the Second World War So Charles Stephenson s deeply researched and absorbing narrative gives this forgotten fleet the recognition it deserves British pre war naval planning for the Far East is part of the story as is the disastrous loss of the battleship Prince of Wales and battlecruiser Repulse in 1941 but the body of the book focuses on the new fleet commanded by Admiral Sir James Somerville and its operations against the Japanese navy and aircraft as well as Japanese and German submarines Later in the war once the fleet had been reinforced with an American aircraft carrier it was strong enough to take more aggressive actions against the Japanese and these are described in vivid detail Charles Stephenson s authoritative study should appeal to readers who have a special interest in the war with Japan in naval history more generally and Royal Navy in particular Praise for The Eastern Fleet and the Indian Ocean 1942-1944 This meticulously researched outstandingly clear well written and absorbing account is long overdue and will most likely become a standard work The text is most helpfully supported by over 80 pages of detailed end notes referenced to each chapter and a detailed index This is not only a book for naval historians but also for anyone with an interest in the War in the Indian Ocean region Highly recommended Military Historical Society I enjoyed this book it gives us an account of an often neglected part of the war at sea and of the achievements of Admiral Somerville who kept his fleet intact in the face of a potentially overwhelming opponent then was willing to acknowledge that his fleet needed to improve massively before it could take on the Japanese Dr John Rickard author and webmaster of the Military History Encyclopedia on the Web
