

Labour Care Guide: Why?

The image shows a sample page from the Labour Care Guide. It features a large grid for recording clinical observations, with columns for time and rows for various parameters. The grid is divided into sections for different stages of labour. To the right of the grid, there is a section for notes, which includes a box for 'Notes on the baby' and a larger box for 'Notes on the mother'. The page is titled 'Labour Care Guide' at the top.

Labour Care Guide was developed to improve every woman's experience of childbirth, and to help ensure the health and well-being of women and their babies by facilitating the effective implementation of the WHO intrapartum care recommendations.

This tool establishes essential good-quality and evidence-based clinical care in all settings, and it expands the focus of labour monitoring to non-clinical practices that promote a positive childbirth experience for every woman and baby.
