

Computer Literacy Exam Information and Study Guide

The Computer Literacy Exam consists of two parts: an objective assessment and a hands-on assessment of Microsoft Office 2007 skills. The objective assessment consists of multiple choice questions. The objective segment tests the student's knowledge of Microsoft applications that include: Word, Excel, PowerPoint, and Access. The hands-on segment consists of four sections:

- **WORD:** Student will complete one or more documents utilizing Microsoft Word 2007.
- **EXCEL:** Student will complete a spreadsheet and chart utilizing Microsoft Excel 2007.
- **POWERPOINT:** Student will construct a slide show utilizing Microsoft PowerPoint 2007.
- **ACCESS:** Student will create a database, query, and report utilizing Microsoft Access 2007.

After completing both portions of the exam, the student will receive the results within **15 school days**.

The student is allowed four (4) hours for the total exam. If a student prefers, due to schedule conflicts, the test may be scheduled in two segments: a one (1) hour segment for the objective assessment and a three (3) hour segment for the hands-on assessment. **Testing arrangements must be made before the student begins the exam and may not be changed once the student has started the test.** In other words, a student may not sign up for a four-hour segment and then decide during the test time that he/she prefers to complete the hands-on segment of the test at a later time. Schedule an appointment by calling the Learning Assistance Center, Tutoring and Testing at 329-3876 or 3870.

If you are waiving the requirement, the fee for the test must be paid as follows: 1) when you call to make the appointment, a \$15 non-refundable, non-transferable administration fee to secure the appointment and 2) \$30 on the date of the test. If you are taking the test for credit, 1) pay a \$15 non-refundable, non-transferable administration fee to secure the appointment and 2) 40% of tuition for 3 credit hours prior to taking the test. Please arrive at the Learning Assistance Center a little early to allow time for processing paperwork.

In order to show eligibility to take the Computer Literacy exam, all UIW students must process a *Request for Credit by Exam* form through their advisor and the Assistant Registrar. Any students wanting credit hours must also process the *Application to Challenge* form. AD/CaP students should process the *Request for Credit by Examination* (to waive or for credit) and the *Application for Challenge Exam* (for credit) through their advisor and the Assistant Registrar for AD/CaP. On the day of the test, the student must bring the yellow copy of the approved *Request for Credit by Exam*, the *Application to Challenge* (if applicable), and the receipt of payment for the administration fee and the test. **The test will not be administered without these documents.**

NOTE: The test may only be taken once. Students who register for and complete the Competency Exam are not allowed to then challenge the Computer Literacy Course for credit. Students wishing to challenge any course for credit must first register with the Registrar's office and pay the appropriate fees for challenging a course.

This study guide includes the course content of a basic Computer Literacy course. Before registering for the test, students should review the study guide. The test will assess the student's knowledge of this material. A student must pass each segment of the test with a 70% or better to be considered to have satisfied the University of the Incarnate Word's requirement for computer literacy and be allowed to waive the requirement of a computer literacy course.

Multiliteracies for a Digital Age Stuart Selber, 2004-01-23 Just as the majority of books about computer literacy deal more with technological issues than with literacy issues most computer literacy programs overemphasize technical skills and fail to adequately prepare students for the writing and communications tasks in a technology driven era *Multiliteracies for a Digital Age* serves as a guide for composition teachers to develop effective full scale computer literacy programs that are also professionally responsible by emphasizing different kinds of literacies and proposing methods for helping students move among them in strategic ways Defining computer literacy as a domain of writing and communication Stuart A Selber addresses the questions that few other computer literacy texts consider What should a computer literate student be able to do What is required of literacy teachers to educate such a student How can functional computer literacy fit within the values of teaching writing and communication as a profession Reimagining functional literacy in ways that speak to teachers of writing and communication he builds a framework for computer literacy instruction that blends functional critical and rhetorical concerns in the interest of social action and change *Multiliteracies for a Digital Age* reviews the extensive literature on computer literacy and critiques it from a humanistic perspective This approach which will remain useful as new versions of computer hardware and software inevitably replace old versions helps to usher students into an understanding of the biases belief systems and politics inherent in technological contexts Selber redefines rhetoric at the nexus of technology and literacy and argues that students should be prepared as authors of twenty first century texts that defy the established purview of English departments The result is a rich portrait of the ideal multiliterate student in a digital age and a social approach to computer literacy envisioned with the requirements for systemic change in mind
