Understanding and Responding to the Experience of Disability Jill Porter,2014-08-13
Understanding and Responding to the Experience of Disability informs readers about current understandings of disability

and ways of recognizing the needs that arise from the lived experience of impairment in schools While most schools have clear procedures in place with respect to identifying children with special educational needs the same is not true for disability Moreover research suggests that many schools have restricted understanding of this distinction often equating disability to children with SEN and children with health conditions thereby failing to recognize the pivotal role of impact In this insightful text Jill Porter argues that disability needs to be understood within the setting in which it is experienced thereby recognizing that it is not a fixed attributable label but one that is cultural contextual and fluid By providing a theoretical basis for understandings of disability around notions of impairment experience and impact the book combines three key components a conceptual understanding of disability to provide a clear value driven framework for professional responses an empirical illustration of the development of materials to support an understanding of why the process of disability data collection cannot simply be reduced to two questions on a form embedded illustrative case study material to provide exemplars of how the materials can be contextualized and used to make adjustments to enhance the participation of all children

Index Medicus ,2001 **Research in Education** ,1974 *Cultural Psychology of Coping with Disasters* Manfred Zaumseil, Silke Schwarz, Mechthild von Vacano, Gavin Brent Sullivan, Johana E. Prawitasari-Hadiyono, 2013-11-21 This book offers a broad theoretical foundation by relating and contrasting relevant international literature with the outcomes of a particular research project It provides a critical reevaluation of the complex phenomena of coping with disasters on a general level by applying this integrative theory of disaster coping to a specific context A cultural psychological model is developed in order to suggest ways of understanding and assessing local and cultural specificity This interaction of the general and locally specific is central to our understanding of cultural psychology of coping with disaster The book provides a basic overview by presenting various approaches to coping with natural disasters and relating them to each other in a coherent manner So far most research approaches either focus on technical social psychological or cultural aspects of coping neglecting their interconnectedness Coping is seldom seen as an extensive long

term process in which disaster relief complexly interacts and is integrated with the local actors and conditions Until now a perspective is missing in which the mentioned modes of coping are integrated with cultural interpretations and practices and long standing forms of communal self help which possibly develop in places that are frequently threatened by natural disasters **Intangibles in Counseling** Clarence Gratton Kemp,1967 PASCAL bibliographie internationale ,1993
