 Whole Child** Marge Scherer, 2009-08-20 This special e-book collection of articles from Educational Leadership and other
 ASCD publications examines the kinds of challenges that best prepare students for college, the world of work and life. The
 authors examine what excellence and high performance mean in various schools and settings around the world and explore
 how to make learning richer and more thought provoking through both rigorous curriculum and formative assessment. They
 look at some ways that both elementary and secondary school teachers can teach problem solving and innovative and
 analytical thinking and they consider how to challenge students preparing for college as well as those readying themselves
 for careers after high school. Articles also examine ways to lead students to address today's 21st century problems,
 acknowledging that citizens of the future will face new challenges and will need new knowledge and skills. The final section
 takes on the question of how to motivate students to embrace challenge that works and made it thrive. Note: This
