Handbook of Recidivism Risk / Needs Assessment Tools Jay P. Singh, Daryl G. Kroner, J. Stephen Wormith, Sarah L. Desmarais, Zachary Hamilton, 2018-02-05 Provides comprehensive coverage on recidivism risk needs assessment tools

Correctional and healthcare professionals around the world utilize structured instruments referred to as risk needs assessment tools to predict the likelihood that an offender will recidivate. Such tools have been found to provide accurate and reliable evaluations and are widely used to assess, manage, and monitor offenders both institutionally as well as in the community. By identifying offenders in need of different levels of intervention, examining causal risk factors, and individualizing case management plans, risk needs assessment tools have proven invaluable in addressing the public health issue of recidivism. *Recidivism Risk Needs Assessment Tools* brings together the developers of the most commonly used risk needs assessment tools to provide a comprehensive overview of their development, peer-reviewed research literature, and practical application. Written by the leading professionals in the field of risk needs assessment, the book provides chapters on: Recidivism Risk Assessment in the 21st Century; Performance of Recidivism Risk Assessment Instruments in Correctional Settings; Correctional Offender Management Profiles for Alternative Sanctions (COMPAS); the Federal Post Conviction Risk Assessment Instrument; the Inventory of Offender Risks, Needs, and Strengths (IORN); the Level of Service (LS) Instruments; the Ohio Risk Assessment System (ORAS); the Self Appraisal Questionnaire (SAQ); the Service Planning Instrument (SPI); the Static Risk Offender Needs Guide (Revised); STRONG R; the Offender Group Reconviction Scale (OGRS); the Forensic Operationalized Therapy Risk Evaluation System (FOTRES); the RiskCanvi; and more. Systematically identifies currently validated recidivism risk needs assessment tools. Reviews research on recidivism risk needs assessment tools used internationally. Each chapter presents sufficient detail to decide whether a given recidivism risk needs assessment tool is right for your practice. *Recidivism Risk Needs Assessment Tools* is ideal for correctional, probation, and parole, and behavioral health professionals.

The Publishers Weekly, 1923 **Federal Probation**, 2003 *Document Retrieval Index*, 1974 *The Foundation Center Source Book Profiles* Foundation Center, 1984 The Psychology of Criminal Conduct James Bonta, D. A. Andrews, 2016-11-10. *The Psychology of Criminal Conduct* Sixth Edition provides a psychological and evidence-informed perspective of criminal behavior that sets it apart from many criminological and mental health explanations of criminal behavior. Drawing upon the General Personality and Cognitive Social Learning theory, James Bonta and Donald Andrews provide an overview of the theoretical context and major knowledge base of the psychology of criminal conduct, discuss the eight major risk need factors of criminal conduct, examine the prediction and classification of criminal behavior along with prevention and rehabilitation, and summarize the major issues in understanding criminal conduct. This book also offers the Risk Need Responsivity (RNR) model of offender assessment and treatment that has guided developments in the subject throughout the world. In this edition, the first since Andrews' death, Bonta carefully maintains the book's original contributions while presenting these core concepts succinctly, clearly, and elegantly. Appropriate for advanced undergraduates and graduate students as well as for scholars, researchers, and practitioners. *The Psychology of Criminal Conduct* Sixth Edition further extends and refines the authors' body of work. **Catalog of Copyright Entries. The Future of Correctional Rehabilitation Ronen Ziv,2017-08-23 In the aftermath of Martinson s 1974 nothing works doctrine scholars have made a concerted effort to develop an evidence based corrections theory and practice to show what works to change offenders Perhaps the most important contribution to this effort was made by a group of Canadian psychologists most notably Donald Andrews James Bonta and Paul Gendreau who developed a treatment paradigm called the Risk Need Responsivity RNR model which became the dominant theory of correctional treatment This approach was more recently challenged by a perspective developed by Tony Ward Shadd Maruna and others called the Good Lives Model GLM Based in part on desistance research and positive psychology this model proposes to rehabilitate offenders by building on the strengths offenders possess GLM proponents see the RNR model as a deficit model that fixes dynamic risk factors rather than identifying what offenders value most and using these positive factors to pull them out of crime Through a detailed examination of both models theoretical and correctional frameworks **The Future of Correctional Rehabilitation Moving Beyond the RNR Model and Good Lives Model Debate** probes the extent to which the models offer incompatible or compatible approaches to offender treatment and suggests how to integrate the RNR and GLM approaches to build a new and hopefully more effective vision for offender treatment A foreword by renowned criminologist Francis T Cullen helps put the material into context This book will be of much interest to scholars and students studying correctional rehabilitation as well as practitioners working with offenders
