

CAT QUANTS 4 MONTH STUDY PLAN

The CAT logo is displayed inside a large white oval with a yellow border. The word 'CAT' is in a bold, black, sans-serif font. A yellow triangle is positioned below the 'A'. A registered trademark symbol (®) is located to the upper right of the 'T'. The background of the entire image is a dark blue gradient, and a large, semi-transparent yellow oval on the right side contains the CAT logo and a blurred image of a person's hands writing on a document.

Muller,Barry Jacobs,2009-12-30 Serotonin 5 hydroxytryptamine often cited as 5 HT is one of the major excitatory neurotransmitter and the serotonergic system is one of the best studied and understood transmitter systems It is crucially involved in the organization of virtually all behaviours and in the regulation of emotion and mood Alterations in the serotonergic system induced by e g learning or pathological processes underlie behavioural plasticity and changes in mood which can finally result in abnormal behaviour and psychiatric conditions Not surprisingly the serotonergic system and its functional components appear to be targets for a multitude of pharmacological treatments examples of very successful drugs

targeting the serotonergic system include Prozac and Zoloft. The last decades of research have not only fundamentally expanded our view on serotonin but also revealed in much more detail an astonishing complexity of this system which comprises a multitude of receptors and signalling pathways. A detailed view on its role in basal but also complex behaviours emerged and was presented in a number of single review articles. Although much is known now the serotonergic system is still a fast growing field of research contributing to our present understanding of the brain's function during normal and disturbed behaviour. This handbook aims towards a detailed and comprehensive overview over the many facets of behavioural serotonin research. As such it will provide the most up to date and thorough reading concerning the serotonergic systems control of behaviour and mood in animals and humans. The goal is to create a systematic overview and first hand reference that can be used by students and scholars alike in the fields of genetics, anatomy, pharmacology, physiology, behavioural neuroscience, pathology and psychiatry. The chapters in this book will be written by leading scientists in this field. Most of them have already written excellent reviews in their field of expertise. The book is divided in 4 sections. After an historical introduction illustrating the growth of ideas about serotonin function in behaviour of the last forty years, section A will focus on the functional anatomy of the serotonergic system. Section B provides a review of the neurophysiology of the serotonergic system and its single components. In section C the involvement of serotonin in behavioural organization will be discussed in great detail while section D deals with the role of serotonin in behavioural pathologies and psychiatric disorders. The first handbook broadly discussing the behavioral neurobiology of the serotonergic transmitter system. Co-edited by one of the pioneers and opinion leaders of the past decades, Barry Jacobs, Princeton, with an international list of 10 countries of highly regarded contributors providing over 50 chapters and including the leaders in the field in number of articles and citations: K. P. Lesch, T. Sharp, A. Caspi, P. Blier, G. K. Aghajanian, E. C. Azmitia and others. The only integrated and complete resource on the market containing the best information integrating international research providing a global perspective to an international community. Of great value not only for researchers and experts but also for students and clinicians as a background reference.

Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording, summarizing and indexing of astronomical publications throughout the world. It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970. Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. Volume 8 contains literature published in 1972 and received before March 15 1973. Some

older literature which was received late and which is not recorded in earlier volumes is also included
