The Accountability of Armed Groups under Human Rights Law Katharine Fortin, Foreword by Andrew Clapham, 2017-08-11 Today the majority of the armed conflicts around the world are fought between States and armed groups rather than between States This changed conflict landscape creates an imperative to clarify the obligations of armed groups under international law While it is generally accepted that armed groups are bound by international humanitarian law the question of whether they are also bound by human rights law is controversial This book brings significant new understanding to the question of whether and when armed groups might be bound by human rights law Its conclusions will benefit international law academics legal practitioners and political scientists and anthropologists working on issues related to rebel governance and civil wars This book addresses the debate on this topic by employing a theoretical historical and comparative analysis that spans international humanitarian law international criminal law and international human rights law Embedding these different perspectives in public international law this book

brings several key points of clarification to the legal framework Firstly the book draws upon social science literature on armed conflict to present a new viewpoint on the role that human rights law plays vis vis international humanitarian law in non international armed conflicts Secondly the book sheds light on the circumstances in which armed groups acquire obligations under human rights law It brings illumination to these topics by combining historical and comparative research on belligerency insurgency and international humanitarian law with a theoretical analysis of legal personality under international law In the final part of the book the author tests the four most utilised theories of how armed groups are bound by human rights law examining whether armed groups can be bound by virtue of i treaty law ii control of territory iii international criminal law and iv customary international law In the book s conclusions the author presents final remarks that are designed to provide concrete guidance on how the issue of armed groups and human rights law can be dealt with more thoroughly in practice

International organization and integration Louis B. Sohn,1986-08-30 In this thoughtful meticulously researched book Professor Blum makes a major contribution to the exposure of an important aspect of UN practice He adds to his academic analysis the insight provided by his years as his country s Ambassador at the UN provides the reader with a fascinating well written argument The book reflects events developments that took place prior to the summer of 1990 during the period marked by global confrontation between the two major power blocs of those days That confrontation found one of its strongest expressions in the United Nations was largely responsible for the deterioration of the legal constitutional climate within the UN With the end of that confrontation as a result of the collapse of the former Soviet bloc the disintegration of the Soviet Union itself a new climate of parliamentary cooperation within the United Nations has come about Consequently there would now appear to exist a real prospect perhaps for the first time since the establishment of the Organization for a reconsideration of at least some of the practices that developed over the years within the cold war context which constitute a departure from the legal constitutional requirements laid down by the Charter It is in this spirit this book is offered to the reader s attention

The Structure of Investment Arbitration Tony Cole, 2013-07-24 Although a State's treatment of foreign investors has long been regulated by international law it is only recently that international investment law has emerged as an independent discipline in its own right In recent decades the practical success of investment arbitration has allowed international investment law to develop both its own cadre of academic and professional specialists and its own legal doctrines This book analyses the structure of international investment law as it has developed through the practice of investment arbitration in order to see how a variety of international investment law doctrines should be understood and applied The book demonstrates how a structural analysis can shed light on several major controversies within investment law and also examines what an investment actually is The book offers an original interpretative approach to the resolution of problems in international investment law and so is one of the few books within the field to attempt to give investment law a solid theoretical basis It also focuses on only a select number of problems rather than attempting to deliver the universal coverage currently popular for investment law books As a result those issues that are addressed get a detailed discussion rarely available in competing texts
