The Real Fake Maria Francesca Piazzoni, 2018-10-30 Thames Town an English like village built in Shanghai is many places at once a successful tourist destination an affluent residential cluster a city of migrant workers and a ghost town *The Real Fake* explores how the users of Thames Town transform a themed space into something more than a fake place Piazzoni understands authenticity as a dynamic relationship between people places

and meanings that enables urban transformations She argues that authenticity underlies the social and physical production of space through both top down and bottom up dynamics The systems of moral and aesthetic judgments that people associate with the authentic materialize in Thames Town Authenticity excludes some users as it inhibits access and usage especially to the migrant poor And yet ideas of the authentic also encourage everyday spontaneous appropriations of space that break the village s staged atmosphere Most scholars criticize theming by arguing that it produces a fake controlling city Piazzoni complicates this view by demonstrating that although the exclusionary character of theming remains unquestionable it is precisely the experience of fakeness that allows Thames Town s users to develop a sense of place Authenticity the ways people construct and spatialize its meanings intervenes holistically in the making and remaking of space Native Tours Erve Chambers,2019-06-20 Previous editions of Native Tours provided a much needed overview and analysis of anthropology s contributions to tourism as an emerging field of study Such a cultural perspective illuminated key ideas surrounding worldwide host guest relations and informed discussions of political and economic influences and the impacts both negative and positive of tourism as one of the world s largest industries Applying a characteristically uncluttered authoritative writing style alongside an exceptional command of the relevant literature Chambers updates refines and extends his earlier work He retains a focus on the social cultural economic and environmental consequences of tourism and provides a framework for understanding tourism initiatives in their particular circumstances Three detailed case studies originating in the American Southwest the Tirolean Alps and Belize illustrate the varied costs and benefits of tourism
