Literature in Context Andrew Hook, 2016-05-20 First published between 1982 and 1983 this series examines the peculiarly American cultural context out of which the nation's literature has developed. Covering the years from 1865 to 1900 this third volume of *American Literature in Context* focuses on the struggles of American writers to make sense of their rapidly changing world. In addition to such major figures as Walt Whitman, Henry James, Emily Dickinson and Mark Twain it analyses the writings of an unorthodox economist Henry George, a Utopian reformer Edward Bellamy and a critical sociologist Thorstein Veblen. Particular attention is paid to the challenge to conventional literary and cultural values represented by writers such as William Dean Howell who pursued a new form of scientific democratic realism in American writing. This book will be of interest to those studying American literature and American studies. The Bookseller, 1913 The Publishers' Circular and Booksellers' Record, 1928 The Age of Fragmentation Alessandro Roncaglia, 2019-12-05 A wide ranging historical account and critical analysis of the global development of economics from 1940 to the present day. *The Science of Sadness* David Huron, 2024-05-07 An accessible scientific account of grief, melancholy and nostalgia in human life and their broader lessons for understanding emotions in general. *The Science of Sadness* proposes an original scientific account of grief, melancholy and nostalgia, advocating a unique ethological approach to these familiar, woeful emotions. One of the leading scholars in the psychology of music and music cognition, David Huron draws on hundreds of studies from physiology, medicine, neuroscience, psychology, anthropology and the arts to resolve long standing problems that have stymied modern emotion research. A careful examination of sadness related behaviors reveals their biological and social functions which Huron uses to formulate a new theory about how emotions in general are displayed and interpreted. We've all shed tears of joy, tears of grief, tears of pain. While different emotions often share the same weepy display, Huron identifies the single function that unites them. He suggests how weeping emerged over the course of human evolution, explores the contrasting cultural manifestations of sadness and chronicles humanity's changing interpretations of sadness over time. Huron also explains the various ways cultures recruit and reshape involuntary emotional displays for different social purposes and he offers a compelling narrative of what makes tragic arts so appealing. Though sadness is typically regarded as the very antithesis of happiness, *The Science of Sadness* draws attention to the important roles that grief, melancholy and nostalgia play in human well-being.
