The ensuing cases and discussions reflect the typical challenges faced by healthcare executives such as medical errors, physician impairment, coworker conflict, gender discrimination, staff shortages, and clinician burnout. The book emphasizes the clear correlation between ethics and management along with the need for managers to consider ethical implications when making management decisions. This revised edition features five new chapters that examine ethics surrounding topics such as Technology in support of remote patient care and remote work, The responsibility of senior healthcare management to create an ethical culture, The COVID 19 pandemic and preparation for the next crisis. The conclusion of the book provides closure to the cases by identifying the consequences of the management actions taken in each instance. It also contains an ethics self assessment that identifies areas for improvement. *The Tracks We Leave* Frankie Perry, 2014. The publication discusses how the tenets of safety described in the beginning of the book can be actively applied in the field to make evidence, information, and knowledge (EIK) sharing processes reliable, effective, and safe. This is a wide-ranging and important book that is designed to raise awareness of the latent risks for patient safety that are present in the EIK identification, acquisition, and distribution processes, structures, and systems of many healthcare institutions across the world. The expert contributors offer systemic, evidence-based improvement processes, assessment concepts, and innovative activities to identify these risks to minimize their potential to adversely impact care.
