The Un Human Development Report:

Human Development Report 2023/2024 United Nations Development Programme, 2024-03-13 Today collective action on challenges ranging from climate change mitigation to peace and security is frustratingly slow or stymied altogether Lack of trust and polarization both associated with insecurity exacerbate the gridlock Shared interlinked global challenges like the pandemic and its recovery are outpacing our willingness and our institutions capacities to respond to them Why despite all our riches and technologies are we so stuck How do we get unstuck Is it possible to mobilize action to address globally shared challenges in a world that is intensively polarized The 2023 2024 Human Development Report explores these issues and offers a platform for strategic discussion on how to move beyond narrow zero sum thinking and support cooperation even as we have diverging interests and views The e book for this publication has been converted into an accessible format for the visually impaired and people with print reading disabilities It is fully compatible with leading screen reader technologies such as JAWS and NVDA

Human Development Report 2004 United Nations Development Programme, 2004 This is the 15th report prepared by a team of independent experts which explores major development issues of global concern The 2004 report focuses on issues of cultural liberty and concludes that countries must actively devise multicultural policies to prevent cultural discrimination whether on grounds of religion ethnicity or language since the expansion of cultural freedoms is at the core of human development Rather than presenting a threat to state unity the report argues that diversity is the only sustainable option to promote stability and democracy within and across societies Issues discussed include confronting extremist movements for cultural domination myths surrounding cultural liberty and development the impact of globalisation on cultural choice social exclusion human rights and participation It also includes data tables for the Human Development Index HDI which measures key social and economic indicators for rich and poor countries including life expectancy health and sanitation employment rights gender equality education and income per person

Human Development Report 1993 United Nations Development Programme, 1993 Since its headline making debut the Human Development Report has become an essential resource for development specialists economists and political scientists around the world While previous Human Development Reports focused on investment in people the 1993 Report not only updates the findings of the earlier volumes but shifts the focus towards the other side of human development mobilizing and utilizing human potential The Report surveys the instruments for enhancing and encouraging participatory patterns of development including privatization and participatory market structures vertical and horizontal decentralization of government functions devolution of government powers enterprise decentralization involvement of NGOs and other grass roots organizations and empowerment of people It probes the vital connections between employment and development and offers a global framework for employment that takes into account the growing pressure for international migration In addition it examines links between human development and international markets for goods capital and labor and presents

updated human development indicators for more than 160 countries **Human Development Report 2005** United Nations Development Programme, 2005 The Human Development Report 2005 examines the scale of the challenge facing the world at the start of the ten year countdown to the 2015 Millennium Development Goals mark The Report focuses on three pillars of cooperation each of which is in urgent need of renovation The first pillar is international aid the Millennium Development Goals MDGs project has been compromised by chronic and sustained under financing allied to problems in aid quality The second pillar is international trade Under the right conditions trade can act as a powerful catalyst for human development The development round of World Trade Organization talks launched in 2001 provided northern governments with an opportunity to create those conditions The third pillar is that of security violent conflict is a source of systematic human rights violation and a barrier to progress towards the MDGs that must be overcome Human Development Report 1995 , *Human Development Report 1996* United Nations Development Programme, 1996 The Human Development Report now in its seventh edition updates the unique Human Development Indicators comparing human development in most countries of the world and the data tables on all aspects of human development The special focus of this edition is on the important link between economic growth and human development The Report maintains that the link is not automatic but can be established through proper policy management arguing the case for initiating and accelerating economic growth and at the same time accelerating and sustaining human development in different parts of the world The Report also maintains that the quality of growth is as important as its quantity otherwise growth can be jobless voiceless ruthless rootless and futureless It identifies employment as an important instrument in translating the benefits of economic growth into people's lives An indispensable resource for courses in international development the Report ranks 174 countries according to the Human Development Index HDI It also gives the global ranking of more than 100 countries in terms of Gender Related Development Index GDI and the Gender Empowerment Measure GEM The first index represents HDI taking into account gender inequality in capabilities and the second represents female opportunities in selected economic and political areas New to this edition is the Capability Poverty Measure CPM which is used as an alternative to the traditional income poverty measure The Report concludes that the future challenge is how to forge and sustain the desired kind of linkage between economic growth and human development in a globalized world which represents both opportunities and threats for the nations of the world Human Development Report , 2011 **National Human Development Report. Poland 2012.**

Regional and Local Development Piotr Arak, Andrey Ivanov, Mihail Peleah, Adam Płoszaj, Kamil Rakocy, Jakub Rok, Kamil Wyszowski, 2013-01-01 *The United Nations world water development report 2019* WWAP, 2019-03-19 Access to water and sanitation is internationally recognized human right Yet more than two billion people lack even the most basic of services The latest United Nations World Water Development Report Leaving No One Behind explores the symptoms of exclusion and investigates ways to overcome inequalities **The United Nations World Water Development Report**

UNESCO World Water Assessment Programme,2021-03-22 Water is a finite and non substitutable resource As the foundation of life societies and economies it carries multiple values and benefits But unlike most other natural resources it has proven extremely difficult to determine its true value The 2021 edition of the United Nations World Water Development Report titled Valuing Water assesses the current status of and challenges to the valuation of water across different sectors and perspectives and identifies ways in which valuation can be promoted as a tool to help improve its management and achieve global sustainable development

Human Development and Global Institutions Richard Ponzio,Arunabha Ghosh,2016-02-05 This book provides a timely and accessible introduction to the foundational ideas associated with the human development school of thought It examines its conceptual evolution during the post colonial era and discusses how various institutions of the UN system have tried to engage with this issue both in terms of intellectual and technical advance and operationally Showing that human development has had a profound impact on shaping the policy agenda and programming priorities of global institutions it argues that human development has helped to preserve the continued vitality of major multilateral development programs funds and agencies It also details how human development faces new risks and threats caused by political economic social and environmental forces which are highlighted in a series of engaging case studies on trade water energy the environment democracy human rights and peacebuilding The book also makes the case for why human development remains relevant in an increasingly globalized world while asking whether global institutions will be able to sustain political and moral support from their member states and powerful non state actors It argues that fresh new perspectives on human development are now urgently needed to fill critical gaps across borders and entire regions A positive forward looking agenda for the future of global governance would have to engage with new issues such as the Sustainable Development Goals energy transitions resource scarcity and expansion of democratic governance within and between nations Redefining the overall nature and specific characteristics of what constitutes human progress in an increasingly integrated and interdependent world this book serves as a primer for scholars and graduate students of international relations and development It is also relevant to scholars of economics political science history sociology and women s studies

Human Development Report 2001 , New Perspectives on Globalization and Antiglobalization Henry Veltmeyer,2016-12-05 This completely revised and updated sequel to Globalization and Antiglobalization advances our understanding of the dynamics of neoliberal globalization and draws our attention towards efforts to construct another world beyond neoliberalism To advance our understanding of these forces and associated processes the collection brings together eleven specialists in the political economy of international relations and globalization to reflect on and analyze the diverse dimensions of the globalization process Taking into account significant developments in the dynamics of globalization and antiglobalization over the past years it includes a new introduction and a new conclusion as well as eight entirely new chapters contributed by authors as diverse and different in their perspectives as James Petras Walden Bello Norman Girvan

Paul Bowles Terry Gibbs Lisa Thompson and Teivo Teivainen These dynamics are contextualized with essays on the Caribbean Latin America East Asia and Southern Africa This is an invaluable volume for students academics and activists concerned with creating a truly new world order **The Short Guide to International Development** Nick

Sage,2022-07-19 International development is a vibrant interdisciplinary area of the social sciences This Short Guide offers a uniquely succinct and balanced account of this politically charged subject It distils both the classic and newer debates together in a clear framework and illustrates them with contemporary examples Designed to introduce a wide readership to international development the book considers how far the field has been reconfigured over time and to what extent it is likely to change in the future reviews contemporary topics including tourism migration and digital technologies includes distinctive international case studies and examples By providing a succinct evaluation of competing approaches to and perspectives on the idea and practice of international development this book offers students across the social sciences a distinct and invaluable introduction to the field Measuring Human Capital Barbara Fraumeni,2021-07-12

Measuring Human Capital addresses a country s most important resource its own people Bettering human capital benefits individuals and their country and leads to improved sustainability for the future For many years economists only used Gross Domestic Product GDP now acknowledged to be inadequate without supplemental measures to gauge a country s overall value There is now a recognition that many variables contribute to a country s worth which make accurate measurement difficult Looking beyond GDP by focusing on human capital researchers policymakers government officials and students can understand what elements impact human capital and how they might improve it in order to increase economic growth and well being Addresses six major measures of human capital covering at least 130 countries Describes both monetary and index estimates Includes two monetary measures by the World Bank and the Inclusive Wealth Report by UNEP and the Urban Institute of Kyushu University Includes four index measures by the Institute for Health Metrics and Evaluation of the University of Washington United Nations Development Programme World Economic Forum and World Bank Includes two country chapters one on China and the other on the United States Human Development Report 2007/2008 United Nations Development Programme,2015-12-29 This year s Human Development Report explains why we have less than a decade to change course and start living within our global carbon budget and how climate change will create long run low human development traps pushing vulnerable people into a downward spiral of deprivation **Health Norms and the Governance of Global**

Development Anders Granmo,Pieter Fourie,2021-02-22 This book maps the emergence of health in global development discourse and governance since 1990 It argues that health norms have emerged diffused and subsequently become internalised through the various direct and indirect negotiation processes that created the global development goals Covid 19 Ebola and HIV AIDS are prime illustrations of the fact that health is supremely political Governments whether they are local national international or multilateral make decisions about their policy responses coordinate their response and channel

the necessary resources Such decisions are informed by local and global conditions as well as sets of values norms and standards that determine policy and interventions As states and regions become more interconnected the politics of health are increasingly relevant to the sustainable future envisioned by global governance This book explains how considerations of global health have come to inform and infuse the United Nations development agenda It identifies processes actors institutions and interactions in global health by analysing two related case studies the Millennium Development Goals and the Sustainable Development Goals Providing an overview of and insights about the context of global development thinking and practice the subtleties of global health and global health governance this book is an innovative contribution to the literature It is suitable for students and scholars of global health development studies and international relations

Displacement, Development, and Climate Change Nina Hall, 2016-03-22 This book focuses on one critical challenge climate change Climate change is predicted to lead to an increased intensity and frequency of natural disasters An increase in extreme weather events global temperatures and higher sea levels may lead to displacement and migration and will affect many dimensions of the economy and society Although scholars are examining the complexity and fragmentation of the climate change regime they have not examined how our existing international development migration and humanitarian organizations are dealing with climate change Focusing on three institutions the United Nations High Commissioner for Refugees the International Organization for Migration and the United Nations Development Programme the book asks how have these inter governmental organizations responded to climate change And are they moving beyond their original mandates given none were established with a mandate for climate change It traces their responses to climate change in their rhetoric policy structure operations and overall mandate change Hall argues that international bureaucrats can play an important role in mandate expansion often deciding whether and how to expand into a new issue area and then lobbying states to endorse this expansion They make changes in rhetoric policy structure and operations on the ground and therefore forge frame and internalize new issue linkages This book helps us to understand how institutions established in the 20th century are adapting to a 21st century world It will be of great interest to scholars and students of International Relations Development Studies Environmental Politics International Organizations and Global Governance as well as international officials

Human Security and Human Rights under International Law Dorothy Estrada-Tanck, 2016-12-01 Human security provides one of the most important protections a person centred axis of freedom from fear from want and to live with dignity It is surprising given its centrality to the human experience that its connection with human rights has not yet been explored in a truly systematic way This important new book addresses that gap in the literature by analysing whether human security might provide the tools for an expansive and integrated interpretation of international human rights The examination takes a two part approach Firstly it evaluates convergences between human security and all human rights civil political economic social and cultural and constructs an investigative framework focused on the human security human rights

synergy It then goes on to explore its practical application in the thematic cores of violence against women and undocumented migrants in the law and case law of UN European Inter American and African human rights bodies It takes both a legal and interdisciplinary approach recognising that human security and its relationship with human rights cuts across disciplinary boundaries Innovative and rigorous this is an important contribution to human rights scholarship

Arab Human Development in the Twenty-first Century Bahgat Korany, 2014-10-01 With its emphasis on the primacy of change this study arrives at a particularly auspicious moment as the Middle East continues to be convulsed by the greatest upheavals in generations which have come to be known as the Arab Spring Originally prepared as the tenth anniversary volume of the UNDP's Arab Human Development Report Arab Human Development in the Twenty first Century places empowerment at the center of human development in the Arab world viewing it not only from the vantage point of a more equitable distribution of economic resources but also of fundamental legal educational and political reform The ten chapters in this book follow closely this political economy framework They look back at what Arab countries have achieved since the early 2000s and forward to what remains to be done to reach full development Supported by a wealth of statistical material they cover the rule of law the evolution of media the persistence of corruption the draining of resources through armed conflict the dominance and increase of poverty the environment and religious education The concluding chapter attempts an inventory of the world literature and different experiences on democratic transition to explore where the region could be heading This critical and timely study is indispensable reading to development specialists and to Middle East scholars and students alike as well as to anyone with an interest in the future trajectory of the region
