Changes and Disturbance in Tropical Rainforest in South-East Asia D. M. Newbery, T. H. Clutton-Brock, Ghilleen T. Prance, Royal Society (Great Britain), 2000 Views on the dynamics of tropical forests are changing rapidly with the recognition that their environment is variable on the decadal to century scale Fluctuating climatic conditions partly determine tropical forest structure species composition and dynamics Tropical communities are also highly contingent in space and time with respect to site and historical factors Tropical forests have experienced to some degree this disturbance regime in the past but climatologists are now predicting increasingly frequent extreme events in the new century The combination of increasing deforestation and land use conversion by man plus an increasingly variable environment means a situation that could be very

Stein,William R. Farrand,2001 Almost every artifact in archaeological analysis originates in or on the ground While there are elaborate methods for extracting and analyzing artifacts treatment of the matrix within which they are located is often unsophisticated and does not include systematic analysis Sediments in Archaeological Context concerns the analysis of this matrix and the potential use of sediments to answer archaeological questions Describing sediments and sampling them in appropriate ways do not replace the study of artifacts but they can provide additional useful information regarding a site complex its physical environment and the relations of artifacts to each other Each chapter in the volume considers sediments within a specific context Topics include sediments found in a variety of environments cultural environments rockshelter and cave environments dryland alluvial environments humid alluvial environments lake environments shoreline environments and spring and wetland environments Sediments in Archaeological

to clarify the nature and the deep causes of phenomena but mostly to predict future and if required manage similar events
Practical benefits from the results of theory to protect people and man made works Landslides and Engineered Slopes
