Reside, 2023 Thousands of shows have opened on Broadway Why do we remember some and not others The musical theatre repertory is not composed of titles popular in the theatre but by those with successful cast recordings movie versions or even illegal bootlegs on YouTube The shows audiences know and the texts and music they expect to hear when they attend a production are defined by media consumed at home more than by memories of performances witnessed in the theatre For example author Doug Reside shows that it is no accident that the serious book musical with a fixed score developed in the 1940s when commercially pressed and marketed record albums made it possible to record most of the score of a new musical in a fixed medium And Hamilton a musical with dense lyrics and revolutionary musical style would not have been as easily accessible to world audiences if most hadn't already had the opportunity to learn the score by listening to free digital streams of the original cast recording The technologies that made these media possible developed concurrently with and shaped the American musical as an art form Reside uncovers how the affordances and limitations of these technologies established a repertory of titles that are most frequently performed and defined by the texts used in these performances *Fixing the Musical* argues that the musicals we most remember are those which most effectively used their era's best recording and distribution technologies to document and share the work with those who would never see the original production on Broadway

So You Want to Be a Scriptwriter and Make a Million Dollars Irving Elman,2000 This book was written to fill a need when I started teaching script writing at Santa Monica College and my students asked me to name a book on the subject I could recommend After voluminous reading I could find nothing which was completely satisfactory Most of it seemed to have been written by people who had never written professionally for films and or television and thus had no first hand knowledge of it from personal experience The books were written from hearsay and observation like trying to learn how to swim by standing at the edge of a pool and watching others do it without ever getting into the water yourself Or trying to fly by flapping your arms like a bird It doesn t work They have no hands on or wings on concept of how commercially produceable scripts are actually put together and then marketed and are of no real practical help to the beginning writer or anyone else who s interested Only a swimmer or a bird or a writer who has made his living at it really knows how his special trick is done and can pass it on to others And so here it is Enjoy while you learn Because if writing isn t fun it s no way to make a living Rob banks instead but try not to get caught

China and the West Michael Saffle, Hon-Lun Yang, 2017-05-09 Western music reached China nearly four centuries ago with the arrival of Christian missionaries yet only within the last century has Chinese music absorbed its influence As China and the West demonstrates the emergence of Westernized music from China concurrent with the technological advances that have made global culture widely accessible has not established a prominent presence in the West China and the West brings together essays on centuries of Sino Western musical exchange by musicologists ethnomusicologists and music theorists

from around the world. It opens with a look at theoretical approaches of prior studies of musical encounters and a comprehensive survey of the intercultural and cross cultural theoretical frameworks: exoticism, orientalism, globalization, transculturation, and hybridization that inform these essays. Part I focuses on the actual encounters between Chinese and European musicians, their instruments and institutions, and the compositions inspired by these encounters, while Part II examines theatricalized and mediated East-West cultural exchanges which often drew on stereotypical tropes resulting in performances more inventive than accurate. Part III looks at the musical language, sonority, and subject matters of intercultural compositions by Eastern and Western composers. Essays in Part IV address reception studies and consider the ways in which differences are articulated in musical discourse by actors serving different purposes, whether self-promotion, commercial marketing, or modes of nationalistic, even propagandistic expression. The volume's extensive bibliography of secondary sources will be invaluable to scholars of music, contemporary Chinese culture, and the globalization of culture.
