These paragraphs discuss why the European Union's membership importance is high for Germany's competitiveness and growth. For this paragraph you will need the sentence that will answer the related questions listed below:

1. They collect information on users' characteristics;
2. Estimate users' different propensities. But all applications, including spam-related ones, require accurate identification of the user's different propensities. Good ratings in spam-related e-mails provide a significant number of useful statistical information that are being collected and well organized;
3. Develop a system. That's where all previous information is processed. (Integration with existing spam filters and other spam-related services is important at this stage). I can't say exactly that a lot of research is going on within a short period of time. I can only say that the whole spam-related activity has started. That's what you will see gradually increasing activity in that direction rather than the quantity of spam;
4. Estimate your individual propensity to get spammed or get into an unwanted spy database. Search for a good way to do it. I'll say more.
