Understanding Concepts

11. Example: The study of Mars falls under the branch of space science. However, studying Mars might also involve analyzing the chemistry of substances found on Mars, which falls under physical science. If scientists search for evidence of life on Mars, then their studies might also fall under life science.
12. The goal of any scientific method is to solve a problem or to better understand an observed event.
13. Controlled experiments are useful in that they can show how one variable (the responding variable) changes with respect to another variable (the manipulated variable), while the remaining variables are controlled.
14. You might modify your hypothesis or formulate a new hypothesis based on your experimental results.
