The Theory Principles And Management Of Taxation An Introduction:

The Theory, Principles and Management of Taxation Jane Frecknall Hughes, 2014-09-15 This book is an introduction to the topic of taxation but from a theoretical aspect and at an advanced level It is primarily aimed at masters students typically studying a module on taxation as part of an MA MSc in various aspects of business management or as part of an MBA Such students are often from non UK backgrounds and are unlikely to have studied the subject before Typically such students would not have the background to enable them to perform any detailed taxation calculations and very many different calculations would be required to address the needs of international students Given the changing nature of taxation these would soon be outdated in any case Therefore a book which clearly and concisely addresses the principles and theory of taxation would be welcomed by lecturers This book aims to do precisely that in an accessible and internationally relevant way It does not aim to provide answers to the questions of how to calculate a taxation liability rather it aims to develop an understanding of why taxation is imposed the different means by which it is imposed and the nature of the problems inherent in this imposition It addresses both the background issues fundamental principles and emerging topics which are poorly addressed elsewhere Philosophy history and principles of taxation Types of taxation and organizational forms including indirect taxation direct taxation tax relief International issues including double taxation treaties residence transfer prices
