Ratcliff,2016-09-12 In the nineteenth century the British Government spent money measuring the distance between the earth and the sun using observations of the transit of Venus This book presents a narrative of the two Victorian transit programmes It draws out their cultural significance and explores the nature of big science in late Victorian Britain **Free Will and the**

Human Sciences in Britain, 1870-1910 Roger Smith,2015-07-28 From the late nineteenth century onwards religion gave way to science as the dominant force in society This led to a questioning of the principle of free will if the workings of the human mind could be reduced to purely physiological explanations then what place was there for human agency and self improvement Smith takes an in depth look at the problem of free will through the prism of different disciplines Physiology psychology philosophy evolutionary theory ethics history and sociology all played a part in the debates that took place His subtly nuanced navigation through these arguments has much to contribute to our understanding of Victorian and Edwardian science and culture as well as having relevance to current debates on the role of genes in determining behaviour

Victorian Literature and the Physics of the Imponderable Sarah C Alexander,2015-07-28 The Victorians were obsessed with the empirical but were frequently frustrated by the sizeable gaps in their understanding of the world around them This study examines how literature and popular culture adopted the emerging language of physics to explain the unknown or imponderable **Victorian Medicine and Popular Culture** Louise Penner,Tabitha Sparks,2016-09-12 This

collection of essays explores the rise of scientific medicine and its impact on Victorian popular culture Chapters include an examination of Charles Dickens s involvement with hospital funding concerns over milk purity and the theatrical portrayal of drug addiction plus a whole section devoted to the representation of medicine in crime fiction This is an interdisciplinary study involving public health cultural studies the history of medicine literature and the theatre providing new insights into Victorian culture and society **From a Photograph** Geoffrey Belknap,2020-08-13 Throughout its early history

photography s authenticity was contested and challenged how true a representation of reality can a photograph provide Does the reproduction of a photograph affect its value as authentic or not From a Photograph examines these questions in the light of the early scientific periodical press exploring how the perceived veracity of a photograph its use as scientific evidence and the technologies developed for printing it were intimately connected Before photomechanical printing processes became widely used in the 1890s scientific periodicals were unable to reproduce photographs and instead included these photographic images as engravings with the label from a photograph Consequently every image was mediated by a human

interlocutor introducing the potential for error and misinterpretation Rather than reading photographs in the context of where or how they were taken this book emphasises the importance of understanding how photographs are reproduced It explores and compares the value of photography as authentic proof in both popular and scientific publications during this period of significant technological developments and a growing readership Three case studies investigate different uses of photography in print using pigeons to transport microphotographs during the Franco Prussian War the debate surrounding the development of instantaneous photography and finally the photographs taken of the Transit of Venus in 1874 unseen by the human eye but captured on camera and made accessible to the public through the periodical Addressing a largely overlooked area of photographic history From a Photograph makes an important contribution to this interdisciplinary research and will be of interest to historians of photography print culture and science *Selene's Two Faces*, 2018-08-13 If any scientific object has over the course of human history aroused the fascination of both scientists and artists worldwide it is beyond doubt the moon The moon is also by far the most interesting celestial body when it comes to reflecting on the dualistic nature of photography as applied to the study of the universe Against this background Selene's Two Faces sets out to look at the scientific purpose aesthetic expression and influence of early lunar drawings maps and photographs including spacecraft imaging In its approach Selene's Two Faces is intermedial intercultural and interdisciplinary It brings together not only various media photography maps engravings lithographs globes texts and cultures from Europe America and Asia but also theoretical perspectives See inside the book *Natural History Societies and Civic Culture in Victorian Scotland* Diarmid A. Finnegan, 2016-09-12 The relationship between science and civil society is essential to our understanding of cultural change during the Victorian era Science was frequently packaged as an appropriate form of civic culture inculcating virtues necessary for civic progress In turn civic culture was presented as an appropriate context for enabling and supporting scientific progress Finnegan's study looks at the shifting nature of this process during the nineteenth century using Scotland as the focus for his argument Considerations of class religion and gender are explored illuminating changing social identities as public interest in science was allowed even encouraged beyond the environs of universities and elite metropolitan societies **Brewing Science, Technology and Print, 1700-1880** James Sumner, 2015-07-28 How did the brewing of beer become a scientific process Sumner explores this question by charting the theory and practice of the trade in Britain and Ireland during the eighteenth and nineteenth centuries *The Making of Modern Anthrax, 1875-1920* James F. Stark, 2016-08-05 From the mid nineteenth century onwards a number of previously unknown conditions were recorded in both animals and humans Known by a variety of names and found in diverse locations by the end of the century these diseases were united under the banner of anthrax Stark offers a fresh perspective on the history of infectious disease He examines anthrax in terms of local national and global significance and constructs a narrative that spans public professional and geographic domains **Uncommon Contexts: Encounters between Science and Literature, 1800-1914** Ben

Marsden, Hazel Hutchinson, Ralph O'Connor, 2016-09-12 Britain in the long nineteenth century developed an increasing interest in science of all kinds Whilst poets and novelists took inspiration from technical and scientific innovations those directly engaged in these new disciplines relied on literary techniques to communicate their discoveries to a wider audience The essays in this collection uncover this symbiotic relationship between literature and science at the same time bridging the disciplinary gulf between the history of science and literary studies Specific case studies include the engineering language used by Isambard Kingdom Brunel the role of physiology in the development of the sensation novel and how mass communication made people lonely *Vision, Science and Literature, 1870-1920* Martin Willis, 2015-07-22 This book explores the Victorian concept of vision across scientific and cultural forms Willis charts the characterization of vision through four organizing principles small large past and future to arrive at a Victorian conception of what vision was Willis then explores how this Victorian vision influenced twentieth century ways of seeing *The Age of Scientific Naturalism* Bernard Lightman, Michael S. Reidy, 2016-02-19 Physicist John Tyndall and his contemporaries were at the forefront of developing the cosmology of scientific naturalism during the Victorian period They rejected all but physical laws as having any impact on the operations of human life and the universe Contributors focus on the way Tyndall and his correspondents developed their ideas through letters periodicals and scientific journals and challenge previously held assumptions about who gained authority and how they attained and defended their position within the scientific community **Astronomy in India, 1784-1876** Joydeep Sen, 2016-09-12 Indian scientific achievements in the early twentieth century are well known with a number of heralded individuals making globally recognized strides in the field of astrophysics Covering the period from the foundation of the Asiatic Society in 1784 to the establishment of the Indian Association for the Cultivation of Science in 1876 Sen explores the relationship between Indian astronomers and the colonial British He shows that from the mid nineteenth century Indians were not passive receivers of European knowledge but active participants in modern scientific observational astronomy *The Making of British Anthropology, 1813-1871* Efram Sera-Shriar, 2016-08-03 Victorian anthropology has been derided as an armchair practice distinct from the scientific discipline of the twentieth century But the observational practices that characterized the study of human diversity developed from the established sciences of natural history geography and medicine Sera Shriar argues that anthropology at this time went through a process of innovation which built on scientifically grounded observational study Far from being an evolutionary dead end nineteenth century anthropology laid the foundations for the field based science of anthropology today Science and Societies in Frankfurt am Main Ayako Sakurai, 2016-09-12 The nineteenth century saw science move from being the preserve of a small learned elite to a dominant force which influenced society as a whole Sakurai presents a study of how scientific societies affected the social and political life of a city As it did not have a university or a centralized government Frankfurt am Main is an ideal case study of how scientific associations funded by private patronage for the good of the local populace became an important centre for

natural history Popular Exhibitions, Science and Showmanship, 1840-1910 Joe Kember, John Plunkett, Jill A. Sullivan, 2016-09-12 Victorian culture was characterized by a proliferation of shows and exhibitions. These were encouraged by the development of new sciences and technologies together with changes in transportation, education and leisure patterns. The essays in this collection look at exhibitions and their influence in terms of location, technology and ideology. Adolphe Quetelet, Social Physics and the Average Men of Science, 1796-1874 Kevin Donnelly, 2015-07-28 Adolphe Quetelet was an influential scientist whose controversial work was condemned by John Stuart Mill and Charles Dickens. He was in contact with many Victorian elite including Babbage, Herschel and Faraday. This is the first scholarly biography of Quetelet exploring his contribution to quantitative reasoning and place in intellectual history. Regionalizing Science Simon Naylor, 2016-09-12 Victorian England as is well known produced an enormous amount of scientific endeavour but what has previously been overlooked is the important role of geography on these developments. Naylor seeks to rectify this imbalance by presenting a historical geography of regional science. Taking an in depth look at the county of Cornwall, questions on how science affected provincial Victorian society, how it changed people's relationship with the landscape and how it shaped society are applied to the Cornish case study, allowing a depth and texture of analysis denied to more general scientific overviews of the period. **James Watt, Chemist** David Philip Miller, 2015-07-22 Miller examines Watt's illustrious engineering career in light of his parallel interest in chemistry, arguing that Watt's conception of steam engineering relied upon chemical understandings.
