Handbook to Life in Renaissance Europe Sandra Sider, 2007 The word renaissance means rebirth

and the most obvious example of this phenomenon was the regeneration of Europe's classical Roman roots. The Renaissance began in northern Italy in the late 14th century and culminated in England in the early 17th century. Emphasis on the dignity of man though not of woman and on human potential distinguished the Renaissance from the previous Middle Ages. In poetry and literature individual thought and action were prevalent while depictions of the human form became a touchstone of Renaissance art. In science and medicine the macrocosm and microcosm of the human condition inspired remarkable strides in research and discovery and the Earth itself was explored situating Europeans within a wider realm of possibilities. Organized thematically the Handbook to Life in Renaissance Europe covers all aspects of life in Renaissance Europe: History, religion, art and visual culture, architecture, literature and language, music, warfare, commerce, exploration and travel, science and medicine, education, daily life.

Chemistry, Student Study Guide James E. Brady, Fred Senese, 2008-01-28. The image on the front cover depicts a carbon nanotube emerging from a glowing plasma of hydrogen and carbon as it forms around particles of a metal catalyst. Carbon nanotubes are a recently discovered allotrope of carbon. Three other allotropes of carbon, buckyballs, graphite and diamond, are illustrated at the left as is the molecule methane CH_4 from which nanotubes and buckyballs can be made. The element carbon forms an amazing number of compounds with structures that follow from simple methane found in natural gas to the complex macromolecules that serve as the basis of life on our planet. The study of chemistry also follows from the simple to the more complex and the strength of this text is that it enables students with varied backgrounds to proceed together to significant levels of achievement.
